<b><u>PROLOGUE</u></b> ■	<b>What Is Discrete Algorithmic Mathematics?</b>	<b>1</b>
<b><u>CHAPTER 0</u></b> ■	<b>Mathematical Preliminaries</b>	<b>8</b>
	0.1 Sets	8
	0.2 Relations	18
	0.3 General Properties of Functions	21
	0.4 Some Important Functions	26
	0.5 Summation and Product Notation	39
	0.6 Matrix Algebra	49
	0.7 Proof and Logic Concepts	56
	Supplementary Problems	66
<b><u>CHAPTER 1</u></b> ■	<b>Algorithms</b>	<b>68</b>
	1.1 Introduction	68
	1.2 The Notion of an Algorithm	71
	1.3 Algorithmic Language	88
	1.4 Recursive Algorithms	100
	1.5 Algorithmic Language—Procedures and Functions	110
	1.6 The Analysis of Algorithms	122
	Supplementary Problems	134
<b><u>CHAPTER 2</u></b> ■	<b>Mathematical Induction</b>	<b>137</b>
	2.1 Introduction	137
	2.2 Examples of Induction	139
	2.3 Strong Induction and Other Variants	155
	2.4 How to Guess What to Prove	162
	2.5 Faulty Inductions	170

2.6	Induction and Algorithms	178
2.7	Inductive Definitions	184
	Supplementary Problems	190

### **CHAPTER 3 ■ Graphs and Trees 194**

3.1	Introduction and Examples	194
3.2	Terminology and Notation	201
3.3	Paths and Cycles—The Adjacency Matrix	214
3.4	Eulerian and Hamiltonian Paths and Cycles	227
3.5	A Shortest Path Algorithm	240
3.6	Breadth First Search and Depth First Search	249
3.7	Coloring Problems	256
3.8	Trees	267
	Supplementary Problems	281

### **CHAPTER 4 ■ Fundamental Counting Methods 288**

4.1	Introduction	288
4.2	First Examples: The Sum and Product Rules	289
4.3	Subtler Examples and the Division Rule	295
4.4	Permutations and Combinations	303
4.5	Combinatorial Identities and Combinatorial Arguments	310
4.6	The Binomial Theorem	315
4.7	Four Common Problems with Balls and Urns	325
4.8	Inclusion-Exclusion	335
4.9	Combinatorial Algorithms	343
4.10	Algorithmic Pigeonholes	357
	Summary	364
	Supplementary Problems	364

### **CHAPTER 5 ■ Difference Equations 366**

5.1	Introduction	366
5.2	Modeling with Different Equations	368
5.3	Getting Information from Difference Equations	379
5.4	Solving Difference Equations: Preliminaries	387
5.5	Second-Order, Constant Coefficient, Homogeneous Difference Equations	390
5.6	Difference Equations of Arbitrary Order	403
5.7	Nonhomogeneous Difference Equations	408
5.8	The General First-Order Linear Difference Equation	415

5.9	Applications to Algorithms	420
	Summary	433
	Supplementary Problems	434
<b>CHAPTER 6</b>	<b>Probability</b>	<b>438</b>
6.1	Introduction	438
6.2	Probability Space	441
6.3	Conditional Probability, Independence, and Bayes' Theorem	451
6.4	Random Variables and Probability Distributions	465
6.5	Expected Value and Variance	480
6.6	Applications to Algorithms: Proofs of Prior Claims	493
6.7	Recursive Methods in Probability	508
	Supplementary Problems	518
<b>CHAPTER 7</b>	<b>An Introduction to Mathematical Logic</b>	<b>522</b>
7.1	Introduction, Terminology, and Notation	522
7.2	The Propositional Calculus	528
7.3	Natural Deduction	551
7.4	Algorithm Verification	559
7.5	Boolean Algebra	564
7.6	The Predicate Calculus	581
7.7	Algorithm Verification Using the Predicate Calculus	594
7.8	Wffs and Algorithms	600
	Supplementary Problems	606
<b>CHAPTER 8</b>	<b>Algorithmic Linear Algebra</b>	<b>608</b>
8.1	Introduction	608
8.2	Gaussian Elimination: Square Systems	610
8.3	Gaussian Elimination: General Case	625
8.4	Gaussian Elimination: A Closer Look	640
8.5	Algorithm LU-GAUSS	646
8.6	Gaussian Elimination and Matrix Algebra	655
8.7	Vector Spaces: Definition and Examples	666
8.8	Vector Spaces: Basic Theory	675
8.9	Eigenvalues	693
8.10	Markov Chains	707
	Supplementary Problems	718

<b>CHAPTER 9</b>	<b>■</b>	<b>Infinite Processes in Discrete Mathematics</b>	<b>722</b>
		9.1 Introduction	722
		9.2 Sequences and Their Limits	725
		9.3 Growth Rates and Order Notation	738
		9.4 Finite Differences and Factorial Functions	746
		9.5 Infinite Series and Their Summation	757
		9.6 Generating Function	773
		9.7 Approximation Algorithms	784
		Supplementary Problems	795
<b>EPILOGUE</b>	<b>■</b>	<b>Sorting Things Out with Sorting</b>	<b>798</b>
		E.1 Comparison of Previous Methods	798
		E.2 The Complexity of Sorting by Comparisons	802
		E.3 Quicksort	815
		Final Problems	829
		References	A1
		Appendixes	A3
		1 Summary of Algorithmic Language	A3
		2 Abbreviations	A5
		List of Algorithms (see inside front cover)	
		Hints and Answers	A7
