

Table of Contents

Chapter I. Inner Product Spaces without Topology

1. Vector Spaces	1
2. Inner Products	3
3. Orthogonality	7
4. Isotropic Vectors	9
5. Maximal Non-degenerate Subspaces	11
6. Maximal Semi-definite Subspaces	12
7. Maximal Neutral Subspaces	14
8. Projections of Vectors on Subspaces	15
9. Ortho-complemented Subspaces	18
10. Dual Pairs of Subspaces	20
11. Fundamental Decompositions	24
Notes to Chapter I	26

Chapter II. Linear Operators in Inner Product Spaces without Topology

1. Linear Operators in Vector Spaces.	28
2. Isometric Operators	31
3. Symmetric Operators	34
4. Cayley Transformations	38
5. Principal Vectors of Cayley Transforms	39
6. Pairs of Inner Products: Semi-boundedness	42
7. Pairs of Inner Products: Sign	44
8. Plus-operators	45
9. Pesonen Operators	48
10. Fundamental Projectors	49
11. Fundamental Symmetries. Angular Operators	52
Notes to Chapter II.	55

Chapter III. Partial Majorants and Admissible Topologies on Inner Product Spaces

1. Locally Convex Topologies on Vector Spaces	58
2. Partial Majorants. The Weak Topology	59
3. Metrizable Partial Majorants	61
4. The Polar of a Normed Partial Majorant	63
5. Admissible Topologies	65
6. Orthogonal Companions and Admissible Topologies	68

7. Projections and Admissible Topologies	70
8. Intrinsic Topology	71
9. Projections and Intrinsic Topology	72
Notes to Chapter III	75

Chapter IV. Majorant Topologies on Inner Product Spaces

1. Majorants	77
2. Majorants and Metrizable Partial Majorants	79
3. Orthonormal Systems	81
4. Minimal Majorants	84
5. Majorants and Decomposability	88
6. Decomposition Majorants	90
7. Invariant Properties of \mathfrak{C}^+ and \mathfrak{C}^-	93
8. Subspaces of Spaces with a Hilbert Majorant	95
Notes to Chapter IV	98

Chapter V. The Geometry of Krein Spaces

1. Krein Spaces	100
2. Krein Spaces as Completions	102
3. Subspaces	103
4. Maximal Semi-definite Subspaces	105
5. Uniformly Definite Subspaces	107
6. Non-uniformly Definite Subspaces	109
7. Maximal Uniformly Definite Subspaces	112
8. Regular and Singular Subspaces	113
9. Alternating Pairs	114
10. Dissipative Operators in Hilbert Space	116
Notes to Chapter V	118

Chapter VI. Unitary and Selfadjoint Operators in Krein Spaces

1. Preliminaries	120
2. The Adjoint of an Operator	121
3. Isometric Operators	124
4. Unitary and Rectangular Isometric Operators	128
5. Spectral Properties of Unitary Operators	131
6. Selfadjoint Operators	133
7. Cayley Transformations	136
8. Unitary Dilations	139
Notes to Chapter VI	145

Chapter VII. Positive Operators and Plus-operators in Krein Spaces

1. Positive Operators	147
2. Operators of the Form T^*T	149
3. Uniformly Positive Operators	151
4. Plus-operators	153

5. Strict Plus-operators	154
6. Doubly Strict Plus-operators	158
Notes to Chapter VII	161

Chapter VIII. Invariant Semi-definite Subspaces of Linear Operators in Krein Spaces

1. Fundamentally Reducible Operators	163
2. Invariant Positive Subspaces of Plus-operators	165
3. Invariant Semi-definite Subspaces of Unitary and Selfadjoint Operators	168
4. Quadratic Pencils of Operators in Hilbert Space	172
5. Quadratic Operator Equations in Hilbert Space	175
6. Spectral Functions	178
Notes to Chapter VIII	180

Chapter IX. Pontrjagin Spaces and Their Linear Operators

1. The Spaces $II_{\tilde{h}}$, Positive Subspaces	184
2. Closed Subspaces	186
3. Isometric Operators: Continuity	188
4. Isometric and Symmetric Operators: Number and Length of Jordan Chains	189
5. Proof of Theorem 4.3	192
6. Regular Symmetric Extensions	197
7. Invariant Positive Subspaces: Existence	200
8. Invariant Positive Subspaces: Uniqueness	201
9. Common Invariant Positive Subspaces for Commuting Operators	204
Notes to Chapter IX	207
