1 page 1

Basic Concepts

1	<i>The Real Numbers</i>	2
2	<i>Intervals</i>	6
3	<i>Functions</i>	10
4	<i>Cartesian Coordinates and the Distance Formula</i>	15
5	<i>Graphs of Functions</i>	20
6	<i>Graphs of Equations</i>	25
7	<i>Direct and Inverse Variation</i>	29
8	<i>Linear Functions</i>	33
9	<i>More about Lines. Slope</i>	37
10	<i>The Trigonometric Functions</i>	43

The Derivative

11	<i>A Geometrical Approach to the Derivative</i>	54
12	<i>Definition of the Derivative</i>	59
13	<i>Limits</i>	65
14	<i>The Rate of Change</i>	75
15	<i>The Differentiation Formula for $D_x x^r$</i>	78
16	<i>General Laws of Differentiation</i>	83
17	<i>The Chain Rule</i>	88
18	<i>Rational Exponents</i>	92
19	<i>The Derivative of $\sin x$</i>	97
20	<i>Differentiation Formulas for the Trigonometric Functions</i>	101
21	<i>The Theorem of the Mean</i>	105
22	<i>Derivatives of Higher Order</i>	112
23	<i>Increasing Functions. Concavity</i>	115

**Applications
of the Derivative**

24	<i>Curve Sketching</i>	125
25	<i>First and Second Derivative Tests for Maxima and Minima</i>	131
26	<i>Problems Involving Maxima and Minima</i>	136
27	<i>Linear Motion</i>	143
28	<i>Related Rates</i>	147
29	<i>Approximations. Newton's Method</i>	151
30	<i>Implicit Differentiation</i>	159

4 page 167

The Conics

31	<i>The Circle. Translation of Axes</i>	167
32	<i>The Ellipse. Symmetry</i>	173
33	<i>The Hyperbola</i>	181
34	<i>The Parabola</i>	189
35	<i>Conics</i>	194

5 page 204

The Integral

36	<i>Approximating Areas</i>	205
37	<i>The Integral</i>	212
38	<i>Integrals of Some Particular Functions</i>	220
39	<i>Calculating Integrals. Approximation Formulas</i>	225
40	<i>The Fundamental Theorem of Calculus</i>	232
41	<i>Integration Formulas</i>	237
42	<i>Area</i>	241
43	<i>Volume of a Solid of Revolution</i>	250
44	<i>Volumes by Slicing</i>	255
45	<i>Work</i>	260

6 page 267

**Exponential, Logarithmic,
Inverse Trigonometric, and Hyperbolic Functions**

46	<i>Functions Defined by Integrals</i>	267
47	<i>The Function \ln</i>	273

48	<i>Inverse Functions</i>	277	
49	<i>The Function \exp and the Number e</i>	283	
50	<i>Integration Formulas for Exponents and Logarithms</i>		289
51	<i>Exponential and Logarithmic Functions</i> (with Bases Other Than e)	293	
52	<i>Inverse Trigonometric Functions</i>	297	
53	<i>Differentiation of the Inverse</i> <i>Trigonometric Functions</i>	302	
54	<i>Integration Formulas That Involve Inverse</i> <i>Trigonometric Functions</i>	307	
55	<i>The Hyperbolic Functions</i>	311	
56	<i>Inverse Hyperbolic Functions</i>	317	

7 page 323

Techniques of Integration

57	<i>Integration Formulas</i>	323	
58	<i>The Method of Substitution</i>	327	
59	<i>Change of Variable of Integration</i>		331
60	<i>Integration by Parts</i>	337	
61	<i>Use of Integration Formulas</i>	341	
62	<i>Antiderivatives of Rational Expressions</i>		345
63	<i>Integrands That Contain Values</i> <i>of the Trigonometric Functions</i>	352	
64	<i>The Differential Equation $D_x F(x) = f(x)$</i>		356
65	<i>The Differential Notation</i>	362	

8 page 368

Polar Coordinates. Vectors in the Plane

66	<i>Polar Coordinates</i>	368	
67	<i>Lines, Circles, and Conics in Polar Coordinates</i>		375

68	<i>Tangents to Polar Curves</i>	383
69	<i>Areas in Polar Coordinates</i>	389
70	<i>Rotation of Axes</i>	393
71	<i>The General Quadratic Equation</i>	399
72	<i>Vectors in the Plane</i>	405
73	<i>Basis Vectors and the Dot Product</i>	412
74	<i>Vector Equations of Curves. Parametric Equations</i>	417
75	<i>Derivatives of Vectors. Arclength</i>	424
76	<i>Curvature, Velocity, and Acceleration</i>	432
77	<i>The Area of a Surface of Revolution</i>	440

9 page 447

Analytic Geometry in Three-Dimensional Space

78	<i>Coordinates and Vectors in Three Dimensions</i>	447
79	<i>Products of Vectors</i>	453
80	<i>Planes</i>	459
81	<i>Cylinders. Surfaces of Revolution</i>	463
82	<i>Quadric Surfaces</i>	468
83	<i>Space Curves</i>	474
84	<i>Lines in Space</i>	480
85	<i>Cylindrical Coordinates. Spherical Coordinates</i>	484

10 page 492

Linear Systems and Matrices

86	<i>Systems of Linear Equations. Triangular Form</i>	493
87	<i>Matrices. Determinative Systems</i>	498

88	<i>Vectors and Matrices</i>	503
89	<i>The Inverse of a Matrix</i>	510
90	<i>The Determinant of a Matrix</i>	516
91	<i>The Transpose of a Matrix</i>	521
92	<i>Characteristic Values and the Diagonalization of a Matrix</i>	525
93	<i>Rotation of Axes</i>	529
94	<i>Graphs of Quadratic Equations</i>	535

11 *page 542*

Partial Derivatives

95	<i>Functions of Several Variables</i>	542
96	<i>Partial Differentiation</i>	546
97	<i>A Chain Rule for Functions of Two Variables</i>	553
98	<i>Additional Chain Rule Equations</i>	559
99	<i>Directional Derivatives. The Gradient</i>	563
100	<i>Normals to Surfaces</i>	569
101	<i>Maxima and Minima of Functions of Several Variables</i>	573

12 *page 580*

Multiple Integration

102	<i>Double Integrals</i>	580
103	<i>Evaluating Double Integrals</i>	588
104	<i>Finding Volumes and Areas by Double Integration</i>	596
105	<i>Moments and Moments of Inertia of Plane Regions</i>	602
106	<i>Double Integrals in Polar Coordinates</i>	610
107	<i>Triple Integrals</i>	616
108	<i>Triple Integrals in Cylindrical and Spherical Coordinates</i>	622

13 page 630

**L'Hospital's Rule.
Improper Integrals**

109	<i>Extensions of the Theorem of the Mean</i>	630
110	<i>L'Hospital's Rule</i>	636
111	<i>Additional Applications of L'Hospital's Rule</i>	644
112	<i>Improper Integrals</i>	647
113	<i>Testing the Convergence of Improper Integrals</i>	653

14 page 660

**Sequences
and Infinite Series**

114	<i>Sequences and Their Limits</i>	661
115	<i>Infinite Series</i>	668
116	<i>Comparison Tests</i>	675
117	<i>Alternating Series</i>	680
118	<i>The Integral Test</i>	687
119	<i>Ratio Tests</i>	693
120	<i>Power Series</i>	699
121	<i>Functions Defined by Power Series</i>	704
122	<i>Taylor's Series</i>	709
123	<i>Using Taylor's Series. The Binominal Series</i>	714

A Trigonometric Formulas page 721

B Limits page 723

Tables page 727

Selected Answers page 734
