CHAPTER	PAGE
I. SPACES . . . . .	1
1. Fields, 1; 2. Vector spaces, 3; 3. Examples, 4; 4. Comments, 5; 5. Linear dependence, 7; 6. Linear combinations, 9; 7. Bases, 10; 8. Dimension, 13; 9. Isomorphism, 14; 10. Subspaces, 16; 11. Calculus of subspaces, 17; 12. Dimension of a subspace, 18; 13. Dual spaces, 20; 14. Brackets, 21; 15. Dual bases, 23; 16. Reflexivity, 24; 17. Annihilators, 26; 18. Direct sums, 28; 19. Dimension of a direct sum, 30; 20. Dual of a direct sum, 31; 21. Quotient spaces, 33; 22. Dimension of a quotient space, 34; 23. Bilinear forms, 35; 24. Tensor products, 38; 25. Product bases, 40; 26. Permutations, 41; 27. Cycles, 44; 28. Parity, 46; 29. Multilinear forms, 48; 30. Alternating forms, 50; 31. Alternating forms of maximal degree, 52	
II. TRANSFORMATIONS . . . . .	55
32. Linear transformations, 55; 33. Transformations as vectors, 56; 34. Products, 58; 35. Polynomials, 59; 36. Inverses, 61; 37. Matrices, 64; 38. Matrices of transformations, 67; 39. Invariance, 71; 40. Reducibility, 72; 41. Projections, 73; 42. Combinations of projections, 74; 43. Projections and invariance, 76; 44. Adjoints, 78; 45. Adjoints of projections, 80; 46. Change of basis, 82; 47. Similarity, 84; 48. Quotient transformations, 87; 49. Range and null-space, 88; 50. Rank and nullity, 90; 51. Transformations of rank one, 92; 52. Tensor products of transformations, 95; 53. Determinants, 98; 54. Proper values, 102; 55. Multiplicity, 104; 56. Triangular form, 106; 57. Nilpotence, 109; 58. Jordan form, 112	
III. ORTHOGONALITY . . . . .	118
59. Inner products, 118; 60. Complex inner products, 120; 61. Inner product spaces, 121; 62. Orthogonality, 122; 63. Completeness, 124; 64. Schwarz's inequality, 125; 65. Complete orthonormal sets, 127;
