CONTENTS

Chapter 1. Binomial Equations

1. Functions and equations 1
2. Illustrations of use of factorization of a function 2
3. Complex numbers in trigonometric form 5
4. Multiplication and division of complex numbers in trigonometric form 7
5. The cube roots of unity in trigonometric form 9
6. De Moivre's theorem 11
7. The fifth roots of unity 12
8. The nth roots of unity 13
9. The nth roots of an arbitrary non-zero complex number 15
10. Relation between the cube roots of a complex number and the cube roots of the conjugate complex number 18

Chapter 2. Cubic and Quartic Equations

1. The general cubic equation and its reduced cubic equation 21
2. Algebraic solution of the reduced cubic equation 22
3. Trigonometric solution of the cubic equation with real roots 25
4. Discriminant of the cubic equation 29
5. Algebraic solution of the quartic equation 32
6. Discriminant of the quartic equation 36

Chapter 3. General Theorems on Roots of Polynomial Equations

1. Integral roots of polynomial equations whose coefficients are integers. Synthetic substitution 43
2. The factor theorem and the remainder theorem. Factored form of a polynomial 48
3. Upper and lower bounds for real roots of a real polynomial equation 55

4. Rational roots of a polynomial equation whose coefficients are integers 61
5. Multiple roots 67

CHAPTER 4. ISOLATION AND COMPUTATION OF REAL ROOTS OF REAL POLYNOMIAL EQUATIONS

1. Isolation of real roots by Sturm's theorem illustrated 82
2. Sturm's theorem 86
3. Descartes' rule of signs 93
4. Horner's method 95

CHAPTER 5. INTRODUCTION TO DETERMINANTS

1. Systems of linear equations and determinants 106
2. Solution of certain systems of numerical equations in three unknowns 106
3. Systems of three linear equations in three unknowns. Determinants of order three. Determinants of order two. Matrices 113

CHAPTER 6. DETERMINANTS

1. Determinants of order four 128
2. Determinants of order five. Determinants of order n 132
3. First and second fundamental properties of determinants of order n 134
4. Expansion of determinants of order n 147
5. Other properties of determinants of order n 153
6. Laplace's development of a determinant of order n. Multiplication of determinants of order n 162

CHAPTER 7. SYSTEMS OF LINEAR EQUATIONS AND DETERMINANTS

1. Systems of n linear equations in n unknowns 180
2. Systems of q linear equations in n unknowns 187
3. Linear homogeneous equations in n unknowns 211
4. Geometrical interpretation if the number of variables is two or three 226

CHAPTER 8. COMPLEX NUMBERS AND THE FUNDAMENTAL THEOREM OF ALGEBRA

1. Complex numbers 236
2. The fundamental theorem of algebra 239

CHAPTER 9. SYMMETRIC FUNCTIONS

1. Relation between the coefficients and the roots of a polynomial equation 241
2. The fundamental theorem on symmetric functions 246
3. Resultants. Discriminants 258
