

CONTENTS

	PAGE
I. INTRODUCTION	1
(a) Preliminaries	1
(b) Survey and Relation to Previous results.....	3
II. FUNDAMENTAL CONCEPTS	5
(a) Geometric Interpretation	5
(b) Outer Products	7
(c) Algebraic Products	12
(d) Extensive Forms	14
(e) Folding Products	15
III. BINARY FORMS	17
(a) Examples	17
(b) Theory of Polars.....	19
(c) Quantics	22
(d) Fundamental Identities	23
(e) Jacobian	25
(f) Omega Operator	26
(g) Hessian	27
(h) Complex Folding Products	28
(i) Compound Folding Products.....	29
(j) The Jacobian Is Reducible.....	31
(k) Syzygies	31
(l) All Rational and Integral Invariants and Covariants Are Folding Products.....	32
(m) Breaking of Complex Products Into Compound Products	35
(n) Conclusion	40
IV. TERNARY GEOMETRIC APPLICATION.....	41
(a) Regressive Products	42
(b) Ternary Extensive Forms.....	43
(c) Folding Products	44
