## Chapter 1 Matrices Which Leave a Cone Invariant

1 Introduction	1
2 Cones	1
3 Spectral Properties of Matrices in $\pi(K)$	6
4 Cone Primitivity	16
5 Exercises	19
6 Notes	23

## Chapter 2 Nonnegative Matrices

1 Introduction	26
2 Irreducible Matrices	29
3 Reducible Matrices	38
4 Primitive Matrices	45
5 Stochastic Matrices	48
6 Exercises	52
7 Notes	59

## Chapter 3 Semigroups of Nonnegative Matrices

1 Introduction	63
2 Algebraic Semigroups	64
3 Nonnegative Idempotents	64
4 The Semigroup $\mathcal{N}_n$	67
5 The Semigroup $\mathcal{D}_n$	82
6 Exercises	83
7 Notes	85

**Chapter 4 Symmetric Nonnegative Matrices**

1	Introduction	87
2	Inverse Eigenvalue Problems	87
3	Nonnegative Matrices with Given Sums	98
4	Exercises	106
5	Notes	109

**Chapter 5 Generalized Inverse-Positivity**

1	Introduction	112
2	Cone Monotonicity	112
3	Irreducible Monotonicity	115
4	Generalized Inverse-Positivity	117
5	Generalized Monomial Matrices	122
6	Set Monotonicity	127
7	Exercises	128
8	Notes	130

**Chapter 6 M-Matrices**

1	Introduction	132
2	Nonsingular M-Matrices	133
3	M-Matrices and Completely Monotonic Functions	142
4	General M-Matrices	147
5	Exercises	158
6	Notes	161

**Chapter 7 Iterative Methods for Linear Systems**

1	Introduction	165
2	A Simple Example	167
3	Basic Iterative Methods	170
4	The SOR Method	172
5	Nonnegativity and Convergence	180
6	Singular Linear Systems	195
7	Exercises	202
8	Notes	207

**Chapter 8 Finite Markov Chains**

1	Introduction	210
2	Examples	213
3	Classical Theory of Chains	217
4	Modern Analysis of Chains	225
5	Exercises	236
6	Notes	240

**Chapter 9 Input–Output Analysis in Economics**

1	Introduction	242
2	A Simple Application	245
3	The Open Model	250
4	The Closed Model	257
5	Exercises	264
6	Notes	267

**Chapter 10 The Linear Complementarity Problem**

1	Introduction	270
2	P-Matrices	271
3	Q-Matrices	275
4	Z-Matrices, Least Elements, and Linear Programs	278
5	Characterizations of Nonsingular M-Matrices	289
6	Exercises	291
7	Notes	294
