

# CONTENTS

	p
Solution of sets of equations .....	2
Construction of algebraically closed fields ....	3
Valuation rings, places .....	5
Valuations .....	17
Degree of field extensions .....	21
Normal extensions and splitting fields .....	25
Separable algebraic extensions .....	28
Galois theory .....	37
Structure of finite fields .....	46
Primitive elements .....	49
Normal bases .....	51
Galois theory of infinite extensions .....	54
Transcendence degree .....	60
General equation .....	63
Cyclic extensions .....	68
Cyclotomic fields .....	70
Solvable groups .....	71
Solvable and radical extensions .....	74
Transcendental extensions .....	79
Linear disjointness and separability .....	83
Index .....	91
