Preface . . . . .	ix
1 Prologue . . . . .	1
2 Euclidean Domains and Euclid's Algorithm . . . . .	3
3 Unique Factorization in Euclidean Domains . . . . .	13
4 Building Fields from Euclidean Domains . . . . .	19
5 Abstract Properties of Finite Fields . . . . .	29
6 Finite Fields Exist and are Unique . . . . .	55
7 Factoring Polynomials over Finite Fields . . . . .	75
8 Trace, Norm, and Bit-Serial Multiplication . . . . .	97
9 Linear Recurrences over Finite Fields . . . . .	123
10 The Theory of $m$ -Sequences . . . . .	151
11 Crosscorrelation Properties of $m$ -Sequences . . . . .	169
Bibliography . . . . .	201
Index . . . . .	203
