# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Organization of this Thesis	2
1.2	Taxonomy of the approaches	3
1.3	Empirical Analysis	4
<b>2</b>	<b>Definitions and Communication Graphs</b>	5
2.1	Terms and Notation	5
2.1.1	Agent	5
2.1.2	Distributed Artificial Intelligence	7
2.1.3	Self-Organisation	15
2.1.4	Stigmergy	18
2.1.5	Evolutionary Algorithms	20
2.2	Problem Notation / Definitions	22
2.3	Neighbourhood Graphs	23
2.3.1	Introduction	23
2.3.2	Notation	25
2.3.3	$k$ NG in One- and Two-Dimensional Space	26
2.3.4	$k$ NG in Three-Dimensional Space	31
2.3.5	Graph Connectivity	36
2.3.6	Energy Efficiency	38
2.3.7	Conclusion	41
<b>3</b>	<b>The Online Partitioning Problem</b>	43
3.1	The OPP	43
3.2	Exact <i>OPP</i> Algorithms	45
3.2.1	Complete Algorithm for Arbitrary Parameters	46
3.2.2	Exact Algorithm for Two Targets	46
3.3	Related Problems	50
3.3.1	Pattern Formation	50
3.3.2	Dynamic Task Allocation	52
3.3.3	Graph Partitioning	52

3.3.4	Network Flows	56
3.4	Formal Model	58
<b>4</b>	<b>Basic Strategies</b>	61
4.1	Non-Communicative Partitioning Strategies	61
4.1.1	Random Target Strategy (RTS)	61
4.1.2	ID-Dependent Strategy (IDS)	62
4.1.3	Next-Target Strategy (NTS)	63
4.2	Communicative Partitioning Strategies	63
4.2.1	Neighbourhood-Based Strategies (NBS)	63
4.2.2	Border Switch Strategy (BSS)	65
4.2.3	Exchange Target Strategy (ETS)	66
4.3	Results	69
4.3.1	Abilities	69
4.3.2	Individual Strategies Tuning	70
4.3.3	Strategy Comparison	73
4.3.4	Standard Deviation	75
4.4	Moving Agents	75
4.4.1	No Effects through Reconsideration	76
4.4.2	Effects through Reconsideration	76
4.5	Conclusion	78
<b>5</b>	<b>Learning Emergent Agent Behaviours</b>	79
5.1	Related Work	80
5.2	Mapping Agents to Cellular Automata	81
5.2.1	Mapping Function	81
5.2.2	Introducing Inexactness and Limitations	84
5.2.3	Conclusion	87
5.3	The Set of Rules for the CA and EA Operators	87
5.3.1	Definitions	87
5.3.2	Evolutionary Operators and Fitness Function	88
5.3.3	Rule Similarity	89
5.3.4	Algorithm & Worst Case Scenario	91
5.3.5	Simulation Environment & Parameters	92
5.3.6	Parameter Tuning	93
5.3.7	Results	95
5.3.8	Conclusion	95
5.4	Memetic Individual Modifications	96
5.4.1	Local Individual- and Generation-Modifications	97
5.4.2	Results	99
5.4.3	Conclusion	101

<b>6</b>	<b>Development of Organisations</b>	103
6.1	Economic Multi Agent System	103
6.2	Schillo's Approach	104
6.3	Enhancement of Schillo's Approach	108
6.3.1	Introducing Agent Delay	108
6.3.2	Introducing Agent Generosity	108
6.3.3	Introducing Locality	110
6.4	Using Schillo's Approach to solve the <i>OPP</i> , Part I	110
6.4.1	The Algorithm	111
6.4.2	Results	112
6.5	Using Schillo's Approach to solve the <i>OPP</i> , Part II	115
6.5.1	The Algorithm	116
6.5.2	Results	120
6.6	Conclusion	123
<b>7</b>	<b>Learning Communication</b>	125
7.1	Introduction	125
7.2	The Static Approach	126
7.2.1	Evaluate the Quality of a Communication Structure	126
7.2.2	The Evolutionary Algorithm	127
7.2.3	Results	128
7.3	The Dynamic Approach	128
7.3.1	Our Approach	130
7.3.2	Size and Characteristics of the $q$ -Intervals in Space	130
7.3.3	The Evolutionary Algorithm	131
7.3.4	Our Algorithm	133
7.4	Results	134
7.4.1	Parameters	134
7.4.2	Fitness Development	134
7.4.3	Limited $q$ -Values	136
7.4.4	Development of $q$ -Table Values	136
7.4.5	Calculation of $q$ -Table Entries	138
7.5	Conclusion	139
<b>8</b>	<b>Applications</b>	141
8.1	WLAN Router Choice	141
8.1.1	WLAN Basics	142
8.1.2	Data Transfer Rate	142
8.1.3	Assigning <i>OPP</i> Algorithms to Access Point Selection	143
8.1.4	Results	144
8.1.5	Conclusion	149
8.2	Local Dynamic Task Allocation	150

8.2.1	Market Based Approaches	150
8.2.2	Insect Based Approaches	151
8.2.3	Mapping to Computer Science	151
8.2.4	Adopting <i>OPP</i> Ideas	155
8.2.5	Results	157
8.2.6	Conclusion	158
8.3	Fire Fighting with Unmanned Aerial Vehicles (UAV)	159
8.3.1	Motivation	159
8.3.2	Advantages and Mapping of <i>OPP</i> Algorithms	159
<b>9</b>	<b>Conclusions and Future Work</b>	<b>161</b>
<b>A</b>	<b>Proofs</b>	<b>165</b>
A.1	Maximum of Product Function	165
A.2	Properties of $q$ -Intervals	165
<b>B</b>	<b>Function characteristics</b>	<b>167</b>
B.1	$\psi$ Function for Mapping	167
B.2	Response Probability Function	168
<b>C</b>	<b>Additional Simulation Results</b>	<b>169</b>
C.1	Final Fitness Values for Different Parameters	169
C.2	sATA and kATA Results	169
C.2.1	sATA and kATA Results for 126 tasks	170
C.2.2	sATA and kATA Results for 1008 tasks	171
C.2.3	sATA and kATA Results for 4032 tasks	172
