

TABLE OF CONTENTS

	<u>Page</u>
ABSTRACT .....	ii
DEDICATION .....	v
INTRODUCTION .....	1
0. SIMPLICIAL OBJECTS IN CATEGORIES .....	8
0.7 Verdier's Coskeleton Functor .....	10
0.8 Simplicial Kernels .....	12
0.11 Augmented Complexes (alternate descriptions) .....	14
0.12 Contractible and Split Complexes .....	15
0.13 The Augmented Coskeleton Functor .....	16
0.14 Stripping or Shift Functor $\text{Dec}^1$ .....	18
0.15 The Adjoint Pair $(+, \text{Dec}^1)$ .....	19
0.17 Nerve of a Category .....	21
0.19 Homology and Cohomology .....	25
1. SIMPLICIAL AND COTRIPLE COHOMOLOGY .....	27
1.1 Cotriple Cohomology .....	28
1.2 Non-Homogeneous Complex .....	29
1.3 Triple Cohomology .....	30
1.4 k-Boundary Systems .....	31
1.5 Differential of a k-Boundary System and Cochain Reduction ..	36
2. U-SPLIT AUGMENTED COMPLEXES AND THE STANDARD RESOLUTION .....	39
2.6 k-Boundary System Defined by a U-Split Complex .....	44
2.7 Naturality of k-Boundary Systems .....	46
3. HOMOTOPY REPRESENTABILITY OF SIMPLICIAL AND COTRIPLE COHOMOLOGY -- THE EILENBERG-MAC LANE COMPLEXES $K(\Pi, n)$ .....	49
3.1 Definition of the Complex $L(\Pi, n)$ .....	49
3.2 Definition of the Complex $K(\Pi, n)$ .....	50
3.7 Corollary (Homotopy Representability of $H_{\mathbb{C}}^n(X_0; \Pi)$ ) .....	57
3.8 Corollary (Homotopy Representability of $H_{\mathbb{C}}^n(X; \Pi)$ ) .....	58
3.9 Definition of the n-th cohomology groupoid $\mathbb{H}^n(X_0; \Pi)$ .....	58
4. $K(\Pi, n)$ -TORSORS .....	60
4.3 Morphisms of n-Torsors .....	72
4.4 Change of Base .....	74
4.5 Identification of $K(\Pi, 1)$ -torsors above X with principal $\Pi$ -objects (i.e. $\Pi$ -torsors) above X .....	75
5. THE CHARACTERISTIC COCYCLE MAPPING $Z_{\mathbb{C}}^n$ .....	90
5.3 Functoriality of $Z^n$ on the Subcategory of Quasi-Coherent Morphisms .....	92
6. STANDARD $K(\Pi, n)$ -TORSOR DEFINED BY AN n-COCYCLE .....	96
6.1 The Standard Resolution of a $\mathbb{T}$ -Algebra .....	98
6.2 Cocycle Formulae .....	99
6.3 Twisted Product Algebra Defined By a 1-Cocycle .....	100
6.6.2 Alternative (Quotient) Construction of the Twisted Product Algebra Defined by a 1-cocycle .....	103
6.7 Construction of the Standard $K(\Pi, n)$ -Torsor Above X Defined by an n-cocycle .....	105
6.8 Functoriality of $S^n(X; \Pi)$ .....	108

	<u>Page</u>
7. THE INTERPRETATION ADJUNCTIONS .....	111
7.2 The Canonical Map $\mathbb{S}^n(Z^n(X_\bullet)) \rightarrow X_\bullet$ .....	113
7.7 Proof That the Canonical Map $f : (\mathbb{S}^n(Z^n(X_\bullet)))_{n-1} \rightarrow (X_\bullet)_{n-1}$ Is a Morphism of $\mathbb{T}$ -Algebras .....	118
8. THE INTERPRETATION BIJECTIONS (FIRST CONCLUSIONS) .....	120
8.9 Theorem (Interpretation of Cotriple Cohomology) .....	123
APPENDIX. TRIPLES, ALGEBRAS, AND TRIPLEABILITY .....	125
A.2 Example: Triple Defined by a Pair of Adjoint Functors .....	125
A.4 The Comparison Functor .....	126
A.7 Properties .....	128
A.8 Inverse Limits .....	129
A.9 Tripleability Over (ENS)-Universal Algebras .....	129
BIBLIOGRAPHY .....	132
