

# TABLE OF CONTENTS

INTRODUCTION	1
Part I. EMBEDDING FINITE COVERS INTO BUNDLES.	
1. Removing singularities of maps.	4
2. Singularities of maps into bundles.	8
3. Embedding covering spaces into bundles.	18
4. The obstruction.	21
PART II. EMBEDDING MANIFOLD-LIKE CONTINUA UP TO SHAPE.	
5. Applications of Part I to embedding continua up to shape.	25
6. An $n$ -manifold-like compactum which does not embed up to shape in $\mathbb{R}^{2n}$ .	30
7. Singularities of coverings of immersions.	32
8. Embedding up to shape manifold-like continua whose factors need not embed.	38
9. Embedding double coverings.	43
10. An example	44
11. $n$ -manifold-like continua which do not embed up to shape in $\mathbb{R}^{2n}$ .	46
