

# Table of Contents

<u>Introduction</u>	1
I. <u>Cycles in Simple Genetic Systems</u>	3
1. The Space of Selection Matrices	5
2. Eigenvalues, Eigenvectors and Linear Differential Equations	9
3. Nonlinear Equilibria and Hopf Bifurcations	18
4. The Hopf Bifurcation Locus	27
5. Parametrization of $\Sigma_H$	32
6. Symmetries	42
7. Concluding Remarks	55
II. <u>Parametric Description of the Hopf Locus</u>	61
1. Linear Maps, Bilinear Forms and Matrices	61
2. Coordinates and the Cylindrical Frame	74
3. Linearizations and Hessians	91
4. The Parametrization	101
5. Symmetric Cases	127
6. MARMC	138
7. Asymptotic Estimates	149
III <u>Programs and Examples</u>	162
1. The General Program	162
2. The Symmetric Program	174
3. Sample Computations	180
<u>Bibliography</u>	186
<u>Index</u>	187
