Introduction	1
1 Separation of eigenvalues for the Laplacian	5
1.1 Small gaps between eigenvalues	5
1.2 Large gaps between selected eigenvalues	11
1.3 The parabola condition	18
2 Eigenvalues for the finite dimensional problem	25
3 Eigenfunctions for the finite dimensional problem	31
4 Eigenvalues for $-\Delta + q$	51
4.1 The bound for $\ TA\ $	52
4.2 Construction of (A, A_1) sets	61
4.3 Intermediate bounds for $\lambda_{\alpha q}$	65
4.4 L^2 bound for $u_{\alpha q} - \tilde{u}_\alpha$	72
4.5 Final bounds for $\tilde{\lambda}_\alpha - \lambda_{\alpha q}, \alpha ^2 - \lambda_{\alpha q}$	75
5 Eigenfunctions for $-\Delta + q$	79
5.1 The L^∞ estimates	80

5.2	Corridors containing nodal lines	81
5.3	Perturbation of nodal domains	85
6	The inverse nodal problem	91
7	The case $\int_R q \neq 0$	103
