Introduction	v
Finite groups with normal p -complements By John G. Thompson	1
Burnside groups and Engel rings By Roger C. Lyndon	4
On the structure of certain solvable groups By Daniel Gorenstein	15
On groups which contain Frobenius groups as subgroups By Walter Feit	22
Current studies on permutation groups By Marshall Hall, Jr.	29
Review of some results in collineation groups By Daniel R. Hughes	42
Some finite groups with geometrical properties By Wilhelm Magnus	56
Symmetrical definitions for the binary polyhedral groups By H. S. M. Coxeter	64
Applications of group characters By Michio Suzuki	88
On maximal subgroups By W. E. Deskins	100
On an application of the theory of Lie algebras to group theory. By Hans Zassenhaus	105
