

CONTENTS OF PART 1

Volume contents.....	v
Photograph of Rivière.....	vi
Nestor M. Rivière (1940–1978).....	vii
Bibliography of N. M. Rivière.....	xv
Some open questions.....	xvii
Photographs of participants	xxiii
Preface.....	xxv
 Chapter 1. Real harmonic analysis	
Some problems in harmonic analysis.....	3
E. M. STEIN	
On operators of harmonic analysis which are not convolutions.....	21
R. R. COIFMAN	
Maximal functions, covering lemmas and Fourier multipliers.....	29
ANTONIO CÓRDOBA	
Covering lemmas, maximal functions and multiplier operators in Fourier analysis	51
R. FEFFERMAN	
Besicovitch theory of linearly measurable sets and Fourier analysis.....	61
MIGUEL DE GUZMÁN	
Weighted norm inequalities for classical operators.....	69
BENJAMIN MUCKENHOUP	
Applications of Fourier transforms to averages over lower dimensional sets.....	85
STEPHEN WAINGER	
Hilbert transforms and maximal functions related to variable curves.....	95
ALEXANDER NAGEL, ELIAS M. STEIN and STEPHEN WAINGER	
Regularity of spherical means.....	99
JACQUES PEYRIÈRE	
Restriction theorems for the Fourier transforms to some manifolds in \mathbf{R}^n	101
ELENA PRESTINI	
Restriction theorems for the Fourier transform.....	111
PETER A. TOMAS	
Riesz potentials and Fourier multipliers.....	115
RICHARD J. BAGBY	

Fourier multipliers vanishing at infinity.....	121
LEONEDE DE MICHELE and IAN R. INGLIS	
Weighted norm inequalities for the Littlewood-Paley function g_λ^*	125
ALBERTO TORCHINSKY	
Weighted norm inequalities for multipliers.....	133
WO-SANG YOUNG	
Non-equivalence between two kinds of conditions on weight functions.....	141
JAN-OLOV STRÖMBERG	
Some remarks about Beckner's inequality.....	149
DANIEL W. STROOCK	
Hypercontractive estimates for semigroups.....	159
FRED B. WEISSLER	
Singular integrals near L^1	163
WILLIAM C. CONNETT	
On Carleson's convergence theorem for L^2 functions.....	167
BOGDAN M. BAISHANSKI	
Multiple Fourier series of functions of generalized bounded variation.....	171
DANIEL WATERMAN	
Some inequalities for Riesz potentials of trigonometric polynomials of several variables.....	175
G. WILMES	
A note on Sobolev spaces.....	183
BJÖRN E. J. DAHLBERG	
Chapter 2. Hardy spaces and BMO	
Some problems in the theory of Hardy spaces.....	189
GUIDO WEISS	
Weak-type inequalities for H^p and BMO.....	201
COLIN BENNET and ROBERT SHARPLEY	
Singular integral characterizations of nonisotropic H^p spaces and the F. and M. Riesz theorem.....	231
R. R. COIFMAN and BJÖRN DAHLBERG	
A maximal theory for generalized Hardy spaces.....	235
ROBERTO A. MACÍAS and CARLOS SEGOVIA	
Local Hardy spaces.....	245
DAVID GOLDBERG	
Distributions with strong maximal functions $L^p(\mathbb{R}^n)$	249
W. R. MADYCH	

Weighted Hardy spaces.....	253
JOSÉ GARCÍA-CUERVA	
Weighted Hardy spaces on Lipschitz domains.....	263
CARLOS E. KENIG	
The atomic decomposition of Hardy spaces.....	275
ROBERT H. LATTER	
The molecular characterization of Hardy spaces.....	281
MITCHELL H. TAIBLESON and GUIDO WEISS	
A characterization of $H^1(\Sigma_{n-1})$	289
FULVIO RICCI and GUIDO WEISS	
Two constructions in BMO.....	295
JOHN B. GARNETT	
Invariant subspaces and subnormal operators.....	303
JAMES E. BRENNAN	
Chapter 3. Harmonic functions, potential theory and theory of functions of one complex variable	
Harmonic functions in Lipschitz domains.....	313
BJÖRN E. J. DAHLBERG	
A survey of harmonic functions on symmetric spaces.....	323
ADAM KORANYI	
Positive harmonic functions vanishing on the boundary of certain domains in \mathbf{R}^{n+1}	345
MICHAEL BENEDICKS	
Positive harmonic functions with zero boundary values.....	349
HARRY KESTEN	
Harmonic functions with BMO boundary values.....	353
UMBERTO NERI	
L^p -capacitary integrals with some applications.....	359
DAVID R. ADAMS	
Sobolev spaces, the Navier-Stokes equations and capacity.....	369
VICTOR L. SHAPIRO and GRANT V. WELLAND	
Approximation in L^p by analytic and harmonic functions.....	377
LARS INGE HEDBERG	
On the Helson-Szegő theorem and a related class of modified Toeplitz kernels..	383
MISCHA COTLAR and CORA SADOSKY	
Some sharp inequalities for conjugate functions.....	409
ALBERT BAERNSTEIN II	

Constructions for $BMO(\mathbb{R})$ and $A_p(\mathbb{R}^n)$	417
PETER W. JONES	
Structure of some subalgebra of L^∞ of the torus.....	421
SUN-YUNG A. CHANG	
A geometric conditions which implies $BMOA$	427
DAVID A. STEGENGA	
Proof of the Beurling-Malliavin theorem by duality and harmonic estimation....	431
PAUL KOOSIS	
Zero sets of absolutely convergent Taylor series.....	439
R. KAUFMAN	
Capacity and uniform algebras.....	445
J. WERMER	
Following functions of class H^2	451
DOUGLAS N. CLARK	
A Hankel type operator arising in deformation theory.....	457
RICHARD ROCHBERG	
Representation theorems for holomorphic and harmonic functions.....	459
R. R. COIFMAN and R. ROCHBERG
