Figures

5.1	Measuring community efficacy – structure and agency	55
8.1	Matrix of the contacts	102
8.2	Contacts in the local institutional landscape	104
8.3	Peripheral actors	106
9.1	Ladder of Progression within the Modular Accreditation Programme (MAP)	117
10.1	Sources of employees in the enterprises	130
10.2	Forms of motivation used by the entrepreneurs	132
10.3	Benefits from planning with workers	135
11.1	Structure of Propaganda and Agitation, 1944	147
11.2	Structure of Propaganda and Agitation, 1948	147
11.3	Structure of Propaganda and Agitation, 1959–1963	148
12.1	The three missions for universities, where the third mission is oriented to exploitation, application and creative use of the available knowledge to increase the innovative capacity of a region	162
12.2	Facilities for learning on different knowledge levels, from learning by just living (in a ‘Haborium’) to learning by creating the subject matter (in a ‘Collaboratory’)	164
12.3	The set of partner-regions for the establishment of the initial network of CoLabs	165
12.4	The Flyinge Village Book produced by local inhabitants as a virtual textbook to learn more about Flyinge as a local community	168
12.5	The Open Learning Lab established at Nymindengab in West Jutland, Denmark	169
12.6	The website for Ed-lab’s facilities for blended eLearning of adults at Gut Gremmelin, Mecklenburg-Vorpommern in Germany	171
12.7	The website for the Dschola collaboratory at Turin, Piedmont in Italy	172
12.8	The website for eKylve and the small villages’ collaboration at Väli-Soumi in Finland	173
12.9	The website Tir Na Gog for collaboration in the music community set up at Bangor in West Wales, UK	174

12.10	The new communication infrastructure for global–local collaboration and networking	176
12.11	The Conersity-model for the creation of new synergies between academia, industry, public authorities and civic communities by a network of CoLabs on the regional level	177
12.12	The prototype website for European Conersity as a network of local CoLabs for learning and collaboration in subject matters of relevance for the future	178
15.1	The university/region value-added management process	210

Tables

3.1	Dimensions of identity in social activity	34
3.2	Synthesised principles and their criteria	37
8.1	Multi-level analysis of the 'interaction system in continuing education'	100
10.1	Forms of bonding strategies used	131
10.2	Frequency of planning with workers per year	134
10.3	Who will be in charge of business when the owner is away	136
15.1	Results of telephone interviews with practitioners in HEIs, cultural organisations, urban regeneration and local and regional authorities	203
16.1	An overview of sustainable development practices surveyed	224
