PART I

THE THEORY OF CURVES AND SURFACES IN THREE-DIMENSIONAL EUCLIDEAN SPACE

I. THE THEORY OF SPACE CURVES	
1. Introductory remarks about space curves	1
2. Definitions	3
3. Arc length	5
4. Tangent, normal, and binormal	7
5. Curvature and torsion of a curve given as the intersection of two surfaces	16
6. Contact between curves and surfaces	18
7. Tangent surface, involutes, and evolutes	21
8. Intrinsic equations, fundamental existence theorem for space curves	23
9. Helices	26
Appendix I. 1. Existence theorem on linear differential equations	27
Miscellaneous Exercises I	29
II. THE METRIC: LOCAL INTRINSIC PROPERTIES OF A SURFACE	
1. Definition of a surface	31
2. Curves on a surface	35
3. Surfaces of revolution	36
4. Helicoids	37
5. Metric	39
6. Direction coefficients	41
7. Families of curves	44
8. Isometric correspondence	48
9. Intrinsic properties	52
10. Geodesics	54
11. Canonical geodesic equations	59
12. Normal property of geodesics	62
13. Existence theorems	65
14. Geodesic parallels	69
15. Geodesic curvature	70
16. Gauss-Bonnet theorem	75
17. Gaussian curvature	78
18. Surfaces of constant curvature	81
19. Conformal mapping	83
20. Geodesic mapping	87

Appendix II. 1. The second existence theorem	90
Miscellaneous Exercises II	92
III. THE SECOND FUNDAMENTAL FORM: LOCAL NON-INTRINSIC PROPERTIES OF A SURFACE	
1. The second fundamental form	95
2. Principal curvatures	97
3. Lines of curvature	99
4. Developables	101
5. Developables associated with space curves	103
6. Developables associated with curves on surfaces	105
7. Minimal surfaces	106
8. Ruled surfaces	107
9. The fundamental equations of surface theory	111
10. Parallel surfaces	116
11. Fundamental existence theorem for surfaces	119
Miscellaneous Exercises III	124
IV. DIFFERENTIAL GEOMETRY OF SURFACES IN THE LARGE	
1. Introduction	127
2. Compact surfaces whose points are umbilics	128
3. Hilbert's lemma	129
4. Compact surfaces of constant Gaussian or mean curvature	131
5. Complete surfaces	131
6. Characterization of complete surfaces	133
7. Hilbert's theorem	137
8. Conjugate points on geodesics	145
9. Intrinsically defined surfaces	151
10. Triangulation	154
11. Two-dimensional Riemannian manifolds	157
12. The problem of metrization	159
13. The problem of continuation	162
14. Problems of embedding and rigidity	164
15. Conclusion	164
PART 2	
DIFFERENTIAL GEOMETRY OF n-DIMENSIONAL SPACE	
V. TENSOR ALGEBRA	
1. Vector spaces	166
2. The dual space	169
3. Tensor product of vector spaces	172
4. Transformation formulae	179
5. Contraction	183
6. Special tensors	185

7. Inner product	188
8. Associated tensors	188
9. Exterior algebra	189
Miscellaneous Exercises V	192

VI. TENSOR CALCULUS

1. Differentiable manifolds	193
2. Tangent vectors	195
3. Affine tensors and tensorial forms	200
4. Connexions	205
5. Covariant differentiation	209
6. Connexions over submanifolds	216
7. Absolute derivation of tensorial forms.	218
Appendix VI. 1. Tangent vectors to manifolds of class ∞	221
Appendix VI. 2. Tensor-connexions	223
Miscellaneous Exercises VI	224

VII. RIEMANNIAN GEOMETRY

1. Riemannian manifolds	226
2. Metric	226
3. The fundamental theorem of local Riemannian geometry	228
4. Differential parameters	231
5. Curvature tensors	232
6. Geodesics	233
7. Geodesic curvature	235
8. Geometrical interpretation of the curvature tensor	236
9. Special Riemannian spaces	237
10. Parallel vectors	239
11. Vector subspaces	240
12. Parallel fields of planes	242
13. Recurrent tensors	245
14. Integrable distributions	249
15. Riemann extensions	258
16. É. Cartan's approach to Riemannian geometry	261
17. Euclidean tangent metrics	266
18. Euclidean osculating metrics	268
19. The equations of structure	271
20. Global Riemannian geometry	273
Bibliographies on harmonic spaces, recurrent spaces, parallel distributions, Riemann extensions	276
Miscellaneous Exercises VII	278

VIII. APPLICATIONS OF TENSOR METHODS TO SURFACE THEORY

1. The Serret-Frenet formulæ	281
2. The induced metric	284

3. The fundamental formulæ of surface theory	287
4. Normal curvature and geodesic torsion	290
5. The method of moving frames	294
Miscellaneous Exercises VIII	299
EXERCISES	300
SUGGESTIONS FOR FURTHER READING	314
INDEX	315
