TABLE OF CONTENTS

CHAPTER 1. Introduction 1

CHAPTER 2. Preliminaries on Induced Representations 7

§

2.1 measures on homogeneous spaces 7

2.2 induced representations 13

CHAPTER 3. Representations Induced by Characters of a Subgroup of the Cartan Subgroup 23

§

3.1 some Lie theory 24

3.2 the characters of a Cartan subgroup 33

3.3 the induction of unitary characters of a closed subgroup of a Cartan subgroup 43

3.4 a preliminary theorem 49

3.5 the relative residue of a character and the unitary equivalence of the representations $\operatorname{ind}_{C_1\uparrow G} \lambda_1$, $\lambda_1 \in \hat{C}_1$.. 59

3.6 $\operatorname{ind}_{C\uparrow G} \lambda$ as a subrepresentation of $L^2(A\backslash G)$ 65

CHAPTER 4. The Tensor Product of Principal Series Representations of a Complex Semi-Simple Lie Group 74

§

4.1 construction of intertwining operators 75

4.2 Harish-Chandra's Plancherel formula 92

4.3 the Frobenius-Mackey reciprocity theorem for non-compact groups 97

4.4 the decomposition of the restriction of the principal series to a Cartan subgroup 107

4.5 the decomposition of the tensor product of principal series representations 115
