

TABLE OF CONTENTS

Preface	v
Chapter I: <i>Preliminaries on Manifolds</i>	
§1. Manifolds	1
§2. Differentiable Mappings and Submanifolds	6
§3. Tangent Spaces	12
§4. Partitions of Unity	15
§5. Vector Bundles	18
§6. Integration of Vector Fields	27
Chapter II: <i>Transversality</i>	
§1. Sard's Theorem	30
§2. Jet Bundles	37
§3. The Whitney C^∞ Topology	42
§4. Transversality	50
§5. The Whitney Embedding Theorem	59
§6. Morse Theory	63
§7. The Tubular Neighborhood Theorem	69
Chapter III: <i>Stable Mappings</i>	
§1. Stable and Infinitesimally Stable Mappings	72
§2. Examples	78
§3. Immersions with Normal Crossings	82
§4. Submersions with Folds	87
Chapter IV: <i>The Malgrange Preparation Theorem</i>	
§1. The Weierstrass Preparation Theorem	91
§2. The Malgrange Preparation Theorem	94
§3. The Generalized Malgrange Preparation Theorem	103
Chapter V: <i>Various Equivalent Notions of Stability</i>	
§1. Another Formulation of Infinitesimal Stability	111
§2. Stability Under Deformations	118
§3. A Characterization of Trivial Deformations	123
§4. Infinitesimal Stability \Leftrightarrow Stability	127
§5. Local Transverse Stability	131
§6. Transverse Stability	138
§7. Summary	141

Chapter VI: *Classification of Singularities, Part I:*
The Thom-Boardman Invariants

§1. The S_r Classification	143
§2. The Whitney Theory for Generic Mappings between 2-Manifolds	145
§3. The Intrinsic Derivative	149
§4. The $S_{r,s}$ Singularities	152
§5. The Thom-Boardman Stratification	156
§6. Stable Maps Are Not Dense	160

Chapter VII: *Classification of Singularities, Part II:*
The Local Ring of a Singularity

§1. Introduction	165
§2. Finite Mappings	167
§3. Contact Classes and Morin Singularities	170
§4. Canonical Forms for Morin Singularities	177
§5. Umbilics	182
§6. Stable Mappings in Low Dimensions	191

Appendix

§A. Lie Groups	194
