

# Table of Contents

<b>Summary of the Book by Sections . . . . .</b>	XIII
--	------

## **Chapter I. Vector Bundles**

1. Quasi–Vector Bundles . . . . .	1
2. Vector Bundles . . . . .	4
3. Clutching Theorems . . . . .	7
4. Operations on Vector Bundles . . . . .	18
5. Sections of Vector Bundles . . . . .	21
6. Algebraic Properties of the Category of Vector Bundles . . . . .	26
7. Homotopy Theory of Vector Bundles . . . . .	35
8. Metrics and Forms on Vector Bundles . . . . .	40
9. Exercises . . . . .	44
10. Historical Note . . . . .	51

## **Chapter II. First Notions of $K$ -Theory**

1. The Grothendieck Group of a Category. The Group $K(X)$ . . . . .	52
2. The Grothendieck Group of a Functor. The Group $K(X, Y)$ . . . . .	59
3. The Group $K^{-1}$ of a Banach Category. The Group $K^{-1}(X)$ . . . . .	71
4. The Groups $K^{-n}(X)$ and $K^{-n}(X, Y)$ . . . . .	82
5. Multiplicative Structures . . . . .	92
6. Exercises . . . . .	105
7. Historical Note . . . . .	111

## **Chapter III. Bott Periodicity**

1. Periodicity in Complex $K$ -Theory . . . . .	113
2. First Applications of Bott Periodicity Theorem in Complex $K$ -Theory .	123
3. Clifford Algebras . . . . .	127
4. The Functors $K^{p,q}(\mathcal{C})$ and $K^{p,q}(X)$ . . . . .	137

5. The Functors $K^{p,q}(X, Y)$ and the Isomorphism $t$ . Periodicity in Real $K$ -Theory . . . . .	148
6. Proof of the Fundamental Theorem . . . . .	161
7. Exercises . . . . .	174
8. Historical Note . . . . .	179

#### **Chapter IV. Computation of Some $K$ -Groups**

1. The Thom Isomorphism in Complex $K$ -Theory for Complex Vector Bundles . . . . .	180
2. Complex $K$ -Theory of Complex Projective Spaces and Complex Projective Bundles . . . . .	188
3. Complex $K$ -Theory of Flag Bundles and Grassmann Bundles. $K$ -Theory of a Product . . . . .	196
4. Complements in Clifford Algebras . . . . .	208
5. The Thom Isomorphism in Real and Complex $K$ -Theory for Real Vector Bundles . . . . .	221
6. Real and Complex $K$ -Theory of Real Projective Spaces and Real Projective Bundles . . . . .	234
7. Operations in $K$ -Theory . . . . .	252
8. Exercises . . . . .	265
9. Historical Note . . . . .	268

#### **Chapter V. Some Applications of $K$ -Theory**

1. $H$ -Space Structures on Spheres and the Hopf Invariant . . . . .	270
2. The Solution of the Vector Field Problem on the Sphere . . . . .	273
3. Characteristic Classes and the Chern Character . . . . .	277
4. The Riemann–Roch Theorem and Integrality Theorems . . . . .	284
5. Applications of $K$ -Theory to Stable Homotopy . . . . .	293
6. Historical Note . . . . .	299

<b>Bibliography</b> . . . . .	301
-------------------------------	-----

<b>List of Notation</b> . . . . .	304
-----------------------------------	-----

<b>Index</b> . . . . .	307
------------------------	-----
