Contents

Introduction 1
Acknowledgements 7

Chapter I - Smooth Manifolds and Mappings

§1. A Preliminary Review of Some Calculus 8
§2. Smooth Manifolds 12
§3. The Differential of a Smooth Mapping 16
§4. Vector Fields and Flows 24
§5. Germs of Smooth Mappings 33

Chapter II - Transversality

§1. The Notion of Transversality 38
§2. The Basic Transversality Lemma 48
§3. An Elementary Transversality Theorem 51
§4. Thom's Transversality Theorem 53
§5. First Order Singularity Sets 54

Chapter III - Unfoldings: The Finite Dimensional Model

§1. Groups Acting on Sets 61
§2. Some Geometry of Jets 62
§3. Smooth Actions of Lie Groups on Smooth Manifolds 73
