

## CONTENTS

|  |     |
|--|-----|
| PREFACE  | v   |
| CHAPTER 1. SOME PRELIMINARIES                        | 1   |
| 1. The Rudiments of Set Theory                       | 1   |
| 2. Some Logic  | 8   |
| 3. Mathematical Induction                            | 12  |
| 4. Inequalities and Absolute Value                   | 16  |
| 5. Equivalence Relations                             | 20  |
| CHAPTER 2. VECTOR SPACES                             | 23  |
| 1. The Cartesian Plane                               | 23  |
| 2. The Definition of a Vector Space                  | 29  |
| 3. Some Elementary Properties of Vector Spaces       | 37  |
| 4. Subspaces   | 40  |
| 5. Linear Transformations                            | 49  |
| 6. Linear Transformations on Euclidean Spaces        | 58  |
| CHAPTER 3. THE DERIVATIVE                            | 71  |
| 1. Normed Vector Spaces                              | 72  |
| 2. Open and Closed Sets                              | 76  |
| 3. Continuous Functions Between Normed Vector Spaces | 83  |
| 4. Elementary Properties of Continuous Functions     | 95  |
| 5. The Derivative                                    | 99  |
| 6. Elementary Properties of the Derivative           | 107 |
| 7. Partial Derivatives and the Jacobian Matrix       | 110 |
| CHAPTER 4. THE STRUCTURE OF VECTOR SPACES            | 119 |
| 1. Spans and Linear Independence                     | 120 |
| 2. Bases   | 128 |
| 3. Bases and Linear Transformations                  | 133 |

|  |         |
|--|---------|
| 4. The Dimension of a Vector Space   | 139     |
| 5. Inner Product Spaces  | 147     |
| 6. The Norm on an Inner Product Space                                      | 153     |
| 7. Orthonormal Bases   | 157     |
| 8. The Cross Product in $\mathbb{R}^3$                                     | 166     |
| <br>CHAPTER 5. COMPACT AND CONNECTED SETS                                  | <br>171 |
| 1. Convergent Sequences  | 171     |
| 2. Further Properties of Continuous Functions                              | 179     |
| 3. Compact Sets  | 185     |
| 4. Upper and Lower Bounds  | 189     |
| 5. Continuous Functions on Compact Sets                                    | 196     |
| 6. A Characterization of Compact Sets                                      | 200     |
| 7. Uniform Continuity  | 205     |
| 8. Connected Sets  | 209     |
| <br>CHAPTER 6. THE CHAIN RULE, HIGHER DERIVATIVES, AND TAYLOR'S<br>THEOREM | <br>215 |
| 1. The Chain Rule  | 216     |
| 2. Proof of the Chain Rule   | 224     |
| 3. Higher Derivatives  | 229     |
| 4. Taylor's Theorem for Functions of One Variable                          | 239     |
| 5. Taylor's Theorem for Functions of Two Variables                         | 245     |
| 6. Taylor's Theorem for Functions of $n$ Variables                         | 251     |
| 7. A Sufficient Condition for Differentiability                            | 257     |
| 8. The Equality of Mixed Partial Derivatives                               | 263     |
| <br>CHAPTER 7. LINEAR TRANSFORMATIONS AND MATRICES                         | <br>267 |
| 1. The Matrix of a Linear Transformation                                   | 268     |
| 2. Isomorphisms and Invertible Matrices                                    | 272     |
| 3. Change of Basis   | 278     |
| 4. The Rank of a Matrix  | 285     |
| 5. The Trace and Adjoint of a Linear Transformation                        | 290     |
| 6. Row and Column Operations   | 300     |
| 7. Gaussian Elimination  | 307     |
| <br>CHAPTER 8. MAXIMA AND MINIMA   | <br>315 |
| 1. Maxima and Minima at Interior Points                                    | 316     |
| 2. Quadratic Forms   | 324     |
| 3. Criteria for Local Maxima and Minima                                    | 332     |
| 4. Constrained Maxima and Minima: I  | 341     |
| 5. The Method of Lagrange Multipliers                                      | 348     |
| 6. Constrained Maxima and Minima: II                                       | 355     |
| 7. The Proof of Proposition 2.3  | 362     |

|   |     |
|---|-----|
| CHAPTER 9. THE INVERSE AND IMPLICIT FUNCTION THEOREMS     | 367 |
| 1. The Inverse Function Theorem                           | 367 |
| 2. The Proof of Theorem 1.3                               | 376 |
| 3. The Proof of the General Inverse Function Theorem      | 380 |
| 4. The Implicit Function Theorem: I                       | 388 |
| 5. The Implicit Function Theorem: II                      | 394 |
| CHAPTER 10. THE SPECTRAL THEOREM                          | 403 |
| 1. Complex Numbers  | 404 |
| 2. Complex Vector Spaces                                  | 409 |
| 3. Determinants   | 417 |
| 4. Properties of the Determinant                          | 424 |
| 5. Eigenvectors and Eigenvalues                           | 434 |
| 6. The Spectral Theorem                                   | 442 |
| 7. The Spectral Theorem for Normal Linear Transformations | 447 |
| 8. Quadratic Forms  | 451 |
| 9. Another Proof of the Spectral Theorem                  | 458 |
| CHAPTER 11. INTEGRATION                                   | 463 |
| 1. Integration of Functions of One Variable               | 464 |
| 2. Properties of the Integral                             | 475 |
| 3. The Integral of a Function of Two Variables            | 484 |
| 4. The Integral of a Function of $n$ Variables            | 494 |
| 5. Properties of the Integral                             | 504 |
| 6. Integrable Functions                                   | 510 |
| 7. The Proof of Theorem 6.2                               | 516 |
| CHAPTER 12. ITERATED INTEGRALS AND THE FUBINI THEOREM     | 521 |
| 1. The Fubini Theorem                                     | 521 |
| 2. Integrals Over Non-Rectangular Regions                 | 530 |
| 3. More Examples  | 537 |
| 4. The Proof of Fubini's Theorem                          | 547 |
| 5. Differentiating Under the Integral Sign                | 551 |
| 6. The Change of Variable Formula                         | 554 |
| 7. The Proof of Theorem 6.2                               | 562 |
| CHAPTER 13. LINE INTEGRALS                                | 573 |
| 1. Curves   | 573 |
| 2. Line Integrals of a Function                           | 578 |
| 3. Line Integrals of Vector Fields                        | 586 |
| 4. Conservative Vector Fields                             | 595 |
| 5. Green's Theorem  | 603 |
| 6. The Proof of Green's Theorem                           | 610 |

|   |     |
|---|-----|
| CHAPTER 14. SURFACE INTEGRALS                       | 617 |
| 1. Surfaces   | 617 |
| 2. Surface Area                                     | 627 |
| 3. Surface Integrals                                | 637 |
| 4. Stokes' Theorem                                  | 645 |
| CHAPTER 15. DIFFERENTIAL FORMS                      | 651 |
| 1. The Algebra of Differential Forms                | 651 |
| 2. Basic Properties of the Sum and Product of Forms | 658 |
| 3. The Exterior Differential                        | 662 |
| 4. Basic Properties of the Exterior Differential    | 669 |
| 5. The Action of Differentiable Functions on Forms  | 672 |
| 6. Basic Properties of the Induced Mapping          | 677 |
| CHAPTER 16. INTEGRATION OF DIFFERENTIAL FORMS       | 683 |
| 1. Integration of Forms                             | 683 |
| 2. The General Stokes' Theorem                      | 688 |
| 3. Green's Theorem and Stokes' Theorem              | 693 |
| 4. The Gauss Theorem and Incompressible Fluids      | 696 |
| 5. Proof of the General Stokes' Theorem             | 703 |
| APPENDIX 1. THE EXISTENCE OF DETERMINANTS           | 707 |
| APPENDIX 2. THE FUNDAMENTAL THEOREM OF ALGEBRA      | 713 |
| APPENDIX 3. JORDAN CANONICAL FORM                   | 717 |
| 1. Generalized Eigenvalues                          | 717 |
| 2. The Jordan Canonical Form                        | 721 |
| 3. Polynomials and Linear Transformations           | 730 |
| 4. The Proof of Theorem 3.5                         | 737 |
| 5. The Proof of Theorem 2.2                         | 742 |
| SOLUTIONS OF SELECTED EXERCISES                     | 747 |
| INDEX   | 777 |
