

Contents

| | |
|--|----|
| Chapter I. Basic Results | 1 |
| 1.1 Introduction | 1 |
| 1.2 The Hilbert Matrix | 2 |
| 1.3 Nonlinear Operators | 6 |
| 1.4 Toeplitz Forms | 8 |
| Chapter II. Sections of Toeplitz and Hilbert Forms. | 11 |
| 2.1 Integral Operators | 11 |
| 2.2 Proof for the Rational Fourier Transform-Continued | 14 |
| 2.3 Statement of the Main Theorem and Proof by Approximation | 21 |
| 2.4 Generalizations | 24 |
| 2.5 Hilbert's Inequality Revisited | 32 |
| 2.6 Homogeneous Kernels of Degree -1 | 36 |
| Chapter III. Hankel Forms | 41 |
| 3.1 Introduction | 41 |
| 3.2 Asymptotic Growth of Orthogonal Polynomials | 43 |
| 3.3 The Lowest Eigenvalue of Sections of a Moments Matrix | 46 |
| 3.4 Generalizations | 52 |
| 3.5 Upper Bounds | 53 |
| 3.6 Spectral Density | 59 |
| 3.7 Hankel Determinants | 62 |
| Chapter IV. Nonlinear Theory | 66 |
| 4.1 Introduction: A Minimax Principle in l^p | 66 |
| 4.2 Carleman's Inequality | 70 |
| References | 80 |
