Preface	<i>page</i> ix
Introduction	xi
Notation	xiii
<b>1 SURVEY OF SIEVE METHODS</b>	<b>1</b>
1 General principles	1
2 Selberg's upper bound sieve	7
3 The lower bound sieve	12
4 The large sieve	17
5 The enveloping sieve	20
6 The normal order method	21
<b>2 ON A PROBLEM OF CHEBYSHEV - AN APPLICATION OF SELBERG'S SIEVE METHOD</b>	<b>23</b>
1 Introduction	23
2 Development of the method	24
3 Transformation of $Y(u; \lambda)$	28
4 Estimation of $\Sigma_D$	31
5 Estimation of $P_\lambda(h, u)$	33
6 Estimation of $\Sigma_E$ and $Y(u; \lambda)$	39
7 Application of the sieve method	39
8 The greatest prime divisor	42
9 Other applications of the method	43
<b>3 ON ARTIN'S CONJECTURE - AN APPLICATION OF THE SIMPLE ASYMPTOTIC SIEVE</b>	<b>46</b>
1 Introduction	46
2 Formulation of the method	47

3	Application of algebraic number theory	page 50
4	Estimation of $\pi(x, k)$ and $P(x, k)$	52
5	Estimation of $N(x, \xi_1)$ and $M(x, \xi_1, \xi_2)$	57
6	The theorem	57
7	Relaxation of hypotheses	58
4	POWER-FREE VALUES OF POLYNOMIALS — A JOINT APPLICATION OF THE SIMPLE ASYMPTOTIC SIEVE AND THE LARGE SIEVE	62
1	Introduction	62
2	Application of the simple asymptotic sieve	64
3	Application of the large sieve to $Y(m)$	66
4	The proof completed	68
5	The problem when the polynomial has prime argument	69
6	The conjugate problem	72
7	Another application of the large sieve	73
5	A PROBLEM OF HARDY AND LITTLEWOOD — AN APPLICATION OF THE ENVELOPING SIEVE (AND THE UPPER BOUND SIEVE)	74
1	Introduction	74
2	Decomposition of sum	77
3	Estimation of $\Sigma_A$ and $\Sigma_C$	78
4	The enveloping sieve	82
5	Further lemmata	85
6	Inequality for $\Sigma_B$	89
7	Estimation of $\Sigma_D$	90
8	Estimation of $\Sigma_E$	93
9	The asymptotic formulae	96
6	ON THE INTEGERS IN AN INTERVAL THAT ARE EXPRESSIBLE AS A SUM OF TWO SQUARES — A NEW APPLICATION OF THE LOWER BOUND SIEVE METHOD	98
1	Introduction	98
2	Lower bound for $2^{-\omega^*(m)}$	100

<i>Contents</i>	vii
3 Lemmata	<i>page</i> 103
4 The order of $M(x, h)$	105
5 Other applications of the method	106
7 PRIMES IN SPARSE SEQUENCES - OTHER APPLICATIONS OF SIEVE METHODS	108
1 Introduction	108
2 Primes in the sequence $a^n + b$	109
3 Cullen's primes	115
Bibliography	119
