1. Theory of Open Coverings

1. Complexes	2
2. Normality of Open Coverings	6
3. Extension of Coverings and Extensors	21
4. Identification Spaces and Absolute Retracts	28
5. Metrization Theorems	30
6. Inverse Limits and Compact Spaces	37
7. Totally Normal Spaces	42

2. Dimension of Normal Spaces

8. Dimension Functions and 0-Dimensional Spaces	44
9. Covering Dimension of Normal Spaces	47
10. Large Inductive Dimension of Normal Spaces	56
11. Subset Theorem and Local Dimension	59

3. Dimension of Metric Spaces	
12. Fundamental Theorems for the Dimension of Metric Spaces	72
13. Topics on Nagata's Metric and Infinite Dimensional Spaces	83
14. Sequences of Coverings Defining Dimension	90
15. Open Mappings and Dimension	94
4. Gaps between Dimension Functions	
16. A Compact Space Missing the Sum Theorem for ind and Ind	99
17. A Normal Space with $\text{ind} = n$ Having Large dim	102
18. Compact Spaces with $\text{dim} = n$ Having Large ind and Ind	107
19. A Normal Space with $\text{ind} = 0$, $\text{dim} = 1$, $\text{Ind} = 2$	114
5. Dimension-Changing Closed Mappings	
20. Relative Dimension	124
21. Dimension-Lowering Closed Mappings	129
22. Directed Families of Closed Coverings	130
23. Dimension-Raising Closed Mappings for Nonmetric Spaces	141
24. Dimension-Raising Closed Mappings for Metric Spaces	143
6. Product Theorem and Expansion Theorem	
25. Product Theorem for Ind	148
26. Product Theorem for dim	150
27. Expansion into Inverse Limits	154
7. Metric-Dependent Dimension Functions	
28. Dimension of the Complement of a Disjoint Sum	165
29. Relations between Metric-Dependent Dimension Functions	172
30. Spaces with $d_2 = \lfloor n/2 \rfloor$ and $\text{dim} \geq n-1$	180
31. Spaces with $\mu \text{dim} = \lfloor n/2 \rfloor$ and $\text{dim} \geq n-1$	183
32. Spaces Illustrating the Dependence of d_2 , d_3 , and μdim on the Metric	185
33. A Space with $d_2 = 2$, $\mu \text{dim} = 3$, $\text{dim} = 4$	190

Appendix Cohomological Dimension Theory*Yukihiro Kodama*

34. Preliminaries: Čech Cohomology Group	196
35. Cohomological Dimension	199
36. A Characteristic Property of $d(X; G)$	201
37. $D(X; G)$ and $d(X; G)$	208
38. Sum Theorem	214
39. Bockstein's Theorem I	219
40. Cantor Manifolds	225
41. Bockstein's Theorem II	231
42. Products of Compact Metric Spaces and Paracompact Spaces	236
43. Subset Theorem and Product Theorem	241
