

TABLE OF CONTENTS

1.	<u>Introduction</u>	1
2.	<u>Primary operations.</u> (Steenrod squares, Eilenberg-MacLane spaces, Milnor's work on the Steenrod algebra.)	4
3.	<u>Stable homotopy theory.</u> (Construction and properties of a category of stable objects.)	22
4.	<u>Applications of homological algebra to stable homotopy theory.</u> (Spectral sequences, etc.)	38
5.	<u>Theorems of periodicity and approximation in homological algebra.</u>	58
6.	<u>Comments on prospective applications of 5, work in progress, etc.</u>	69
	Bibliography	74
	Appendix	75
