

CONTENTS

Introduction

1. ON THE NIELSEN REALIZATION PROBLEM. PRELIMINARIES	1
11. The Nielsen Realization Problem: an Introduction	2
12. Guide to the text	8
13. Linear Fractional Transformations	10
14. Non-Euclidean Geometry	17
15. Discontinuous Groups of the Plane	31
16. On Group Extensions	44
Exercises	63
2. TORI, CRYSTALLOGRAPHIC GROUPS AND THE REALIZATION OF MAPPING CLASSES	65
21. The Modular Problem for Tori	67
22. Discontinuous Groups of Motions of the Euclidean Plane	74
23. The Group of Automorphisms of $\mathbf{Z} \oplus \mathbf{Z}$	82
24. Effective Extensions of $\mathbf{Z} \oplus \mathbf{Z}$	86
25. Crystallographic Groups	101
26. Crystallographic Groups: Proofs	110
27. Cohomological Interpretation of the Zassenhaus Equations	134
Exercises	138
3. MARKED RIEMANN SURFACES AND FUCHSIAN GROUPS AND FENCHEL'S REALIZATION THEOREM	140
31. Factor Surfaces	141
32. Marked Riemann Surfaces and Fuchsian Groups	150
33. Moduli for the Indecomposable Marked Fuchsian Groups	160
A. Signature (0;0;0;3)	162
B. Signatures (0;1;0;2) or (0;0;1;2)	167
C. Signatures (0;2;0;1), (0;1;1;1) and (0;0;2;1)	172
D. Signature (1;0;0;1)	176
E. Signatures (1;1;0;0) and (1;0;1;0)	183
F. The Remaining Cases	185
34. The Space of Moduli of Marked Fuchsian Groups	187
35. On Other Approaches to the Modular Problem	193
36. The Smith Fixed Point Theorem	196
37. Realizing Finite Solvable Groups of Mapping Classes	199
Exercises	202

4. THE NIELSEN CONSTRUCTION OF FINITE GROUPS OF MAPPING CLASSES	204
41. The Mappings of the Limit Points	206
42. Types of Mappings on \bar{G}_F	211
43. Simple Axis	215
44. On the Construction of Extensions	218
45. Extension to Simple Axes	223
46. Cross Cuts	228
47. Extension to K_F	237
48. On the Shift Length	242
49. On the Existence of a Simple Axis	245
Exercises	253
5. ON THE NIELSEN REALIZATION PROBLEM	254
51. Introduction	255
52. The Generalized Riemann-Hurwitz Formula	257
53. On Extensions without Simple Axes	267
54. The Extension Theorem in Case of the Existence of a Simple Axis and First Applications	271
55. On the Signature of Subgroups	280
56. Further Applications of the Extension Theorem	283
Exercises	294
6. ON FINITE GROUPS OF MAPPING CLASSES OF 3-MANIFOLDS: SOME APPLICATIONS	296
61. Finite Groups of Mapping Classes of Fibered 3-Manifolds	297
62. Examples	306
63. On Finite Groups of Mapping Classes of Seifert Fiber Spaces	315
64. Finite Groups of Mapping Classes of Seifert Fiber Spaces that Fiber Over S^1	321
Exercises	327
Bibliography	330
List of Notation	338
Index	339
