

Contents

Preface	vii
I. Axioms and general theorems	3
II. Simplicial complexes	54
III. Homology theory of simplicial complexes	76
IV. Categories and functors	108
V. Chain complexes	124
VI. Formal homology theory of simplicial complexes	162
VII. The singular homology theory	185
VIII. Systems of groups and their limits	212
IX. The Čech homology theory	233
X. Special features of the Čech theory	257
XI. Applications to euclidean spaces	298
Index	324
