Preface	
§ 1 Definition and general properties of the fundamental group	1
§ 2 Free products of groups and their quotients	10
§ 3 On calculation of fundamental groups	24
§ 4 Examples	36
§ 5 The group of a tame link given by a good plane projection	43
§ 6 Antoine's Necklace	48
§ 7 Elementary ideals - Alexander polynomials	54
§ 8 Construction of 3-manifolds	
a) Whitehead manifold	61
b) Homology 3-sphere of Dehn	67
§ 9 Involutions of S^4 . Four dimensional contractible manifolds whose boundaries are not simply connected. One parameter group of homeomorphisms of S^5	75
Addendum	88
ERRATA	91
