

Contents

INTRODUCTION

1. <i>Principal Ideal Domains and Unique Factorization Domains</i>	3
2. <i>Commutative Fields</i>	11

PART ONE

3. <i>Residue Classes</i>	27
4. <i>Quadratic Residues</i>	49

PART TWO

5. <i>Algebraic Integers</i>	71
6. <i>Integral Basis, Discriminant</i>	87
7. <i>The Decomposition of Ideals</i>	103
8. <i>The Norm and Classes of Ideals</i>	119
9. <i>Units and Estimations for the Discriminant</i>	129
10. <i>Ramification, Discriminant and Different</i>	161
11. <i>The Ramification of Prime Ideals in Galois Extensions</i>	221
12. <i>The Fundamental Theorem of Abelian Extensions</i>	233
13. <i>Miscellaneous Numerical Examples</i>	245

<i>Bibliography</i>	291
