

# CONTENTS

Chapter I. The Thom Isomorphism in K-theory.....	1
1. Exterior Algebra.....	1
2. Tensor products of exterior algebras .....	5
3. Application to bundles .....	11
4. Thom classes of line bundles .....	18
5. Cobordism and homomorphisms into K-theory .....	25
6. The homomorphism $\mu_c$ .....	30
 Chapter II. Cobordism Characteristic Classes .....	 38
7. A theorem of Dold .....	39
8. Characteristic classes in cobordism .....	48
9. Characteristic classes in K-theory .....	52
10. A cobordism interpretation for $K^*(X)$ .....	59
11. Mappings into spheres .....	65
 Chapter III. U-Manifolds with Framed Boundaries .....	 69
12. The U-bordism groups $\Omega_*^U$ .....	70
13. Characteristic numbers from K-theory .....	78
14. The theorem of Stong and Hattori .....	82
15. U-manifolds with stably framed boundaries .....	91
16. The bordism groups $\Omega_*^{U, fr}$ .....	96
17. The groups $\Omega_*^{U, SU}$ .....	105
18. The image of $\Omega_*^{fr}$ in $\Omega_*^{SU}$ .....	108
 Bibliography .....	 111
