

CONTENTS

	PAGE
CHAPTER I. FUNDAMENTAL CONSIDERATIONS	
Sect. 1. Introductory	1
2. Characteristics of Pure Mathematics	1
3. Definition of Geometry	4
CHAPTER II. AXIOMS OF CLASSIFICATION	
Sect. 4. Axioms of Projective Geometry	7
5. The Harmonic Relation	8
6. The Uniqueness of the Harmonic Conjugate	8
7. Desargues' Theorem	10
8. Fano's Axiom	13
CHAPTER III. PROJECTIVITY	
Sect. 9. The Projective Relation	16
10. Projectivity of the Second Degree	17
11. The Fundamental Theorem	19
12. Pappus' Theorem	21
CHAPTER IV. ORDER	
Sect. 13. Segments	24
14. Axioms of Order	25
15. The Concordance of Senses	26
16. Wider Definition of Segments	27
17. Propositions on Order	27
18. Harmonic Systems	29
19. The Lüroth-Zeuthen Theorem	30
20. von Staudt's Continuity Proof	33

	PAGE
CHAPTER V. QUADRANGULAR INVOLUTIONS	
Sect. 21. Considerations upon Involutions	34
22. Definition of Quadrangular Involutions	35
23. Special Case	36
24. Theorems on Involutions	36
25. Theorem equivalent to the Fundamental Theorem	38
26. Quadrangular Transformations	39
CHAPTER VI. LINEAR NUMERATION-SYSTEMS	
Sect. 27. Number and Geometry	41
28. Systems of Magnitudes	42
29. Positive and Negative Magnitudes	44
30. Prospectivities and Magnitudes	44
31. Prospectivities and Axioms of Magnitude	45
32. Prospectivities and Order	46
33. Prospectivities and Order (<i>continued</i>)	48
34. Numeration-Systems Defined	48
35. Construction of an Aggregate of Points everywhere dense	49
CHAPTER VII. COORDINATES	
Sect. 36. Comparison of Numeration-Systems	51
37. Assignment of Coordinates	52
38. Anharmonic Ratios	53
39. Special cases	54
40. Anharmonic Ratios and Numeration-Systems	54
41. Transformation of Coordinates	55
42. Coordinates in Three Dimensions	56
CHAPTER VIII. EXISTENCE THEOREMS	
Sect. 43. Existence Theorem of Projective Geometry	58
44. Independence of the Fundamental Theorem	59
45. Independence of the Fundamental Theorem (<i>continued</i>)	60
46. Independence of the Fundamental Theorem (<i>continued</i>)	61
47. Independence of the Fundamental Theorem (<i>continued</i>)	61
48. Independence of the Fundamental Theorem (<i>continued</i>)	62
