

Contents

CHAPTER ONE

| | |
|---|----------|
| Two-Dimensional Manifolds | 1 |
| 1 Introduction | 1 |
| 2 Definition and examples of n -manifolds | 2 |
| 3 Orientable vs. nonorientable manifolds | 3 |
| 4 Examples of compact, connected 2-manifolds | 6 |
| 5 Statement of the classification theorem for compact surfaces | 10 |
| 6 Triangulations of compact surfaces | 15 |
| 7 Proof of Theorem 5.1 | 18 |
| 8 The Euler characteristic of a surface | 29 |
| 9 Manifolds with boundary | 35 |
| 10 The classification of compact, connected 2-manifolds with boundary | 37 |
| 11 The Euler characteristic of a bordered surface | 42 |
| 12 Models of compact bordered surfaces in Euclidean 3-space | 43 |
| 13 Remarks on noncompact surfaces | 47 |

CHAPTER TWO

| | |
|---|-----------|
| The Fundamental Group | 55 |
| 1 Introduction | 55 |
| 2 Basic notation and terminology | 56 |
| 3 Definition of the fundamental group of a space | 58 |
| 4 The effect of a continuous mapping on the fundamental group | 63 |
| 5 The fundamental group of a circle is infinite cyclic | 68 |
| 6 Application: The Brouwer fixed-point theorem in dimension 2 | 74 |
| 7 The fundamental group of a product space | 76 |
| 8 Homotopy type and homotopy equivalence of spaces | 78 |

CHAPTER THREE

| | |
|--|-----------|
| Free Groups and Free Products of Groups | 85 |
| 1 Introduction | 85 |
| 2 The weak product of abelian groups | 85 |
| 3 Free abelian groups | 89 |
| 4 Free products of groups | 97 |
| 5 Free groups | 102 |
| 6 The presentation of groups by generators and relations | 105 |
| 7 Universal mapping problems | 108 |

CHAPTER FOUR

| | |
|---|------------|
| Seifert and Van Kampen Theorem on the Fundamental Group of the Union of Two Spaces. Applications | 113 |
| 1 Introduction | 113 |
| 2 Statement and proof of the theorem of Seifert and Van Kampen | 114 |

| | | |
|----------|---|-----|
| 3 | First application of Theorem 2.1 | 122 |
| 4 | Second application of Theorem 2.1 | 127 |
| 5 | Structure of the fundamental group of a compact surface | 129 |
| 6 | Application to knot theory | 136 |

CHAPTER FIVE

Covering Spaces **145**

| | | |
|-----------|--|-----|
| 1 | Introduction | 145 |
| 2 | Definition and some examples of covering spaces | 145 |
| 3 | Lifting of paths to a covering space | 151 |
| 4 | The fundamental group of a covering space | 154 |
| 5 | Lifting of arbitrary maps to a covering space | 155 |
| 6 | Homomorphisms and automorphisms of covering spaces | 158 |
| 7 | The action of the group $\pi(X, x)$ on the set $p^{-1}(x)$ | 161 |
| 8 | Regular covering spaces and quotient spaces | 164 |
| 9 | Application: The Borsuk-Ulam theorem for the 2-sphere | 170 |
| 10 | The existence theorem for covering spaces | 173 |
| 11 | The induced covering space over a subspace | 177 |
| 12 | Point set topology of covering spaces | 180 |

CHAPTER SIX

**The Fundamental Group and Covering Spaces of a Graph.
Applications to Group Theory** **189**

| | | |
|----------|----------------------------|-----|
| 1 | Introduction | 189 |
| 2 | Definition and examples | 190 |
| 3 | Basic properties of graphs | 192 |

| | | |
|---|--|-----|
| 4 | Trees | 194 |
| 5 | The fundamental group of a graph | 197 |
| 6 | The Euler characteristic of a finite graph | 200 |
| 7 | Covering spaces of a graph | 201 |
| 8 | Generators for a subgroup of free group | 204 |

CHAPTER SEVEN

The Fundamental Group of Higher Dimensional Spaces **211**

| | | |
|---|---|-----|
| 1 | Introduction | 211 |
| 2 | Adjunction of 2-cells to a space | 212 |
| 3 | Adjunction of higher dimensional cells to a space | 214 |
| 4 | CW-complexes | 215 |
| 5 | The Kurosh subgroup theorem | 218 |
| 6 | Grushko's Theorem | 225 |

CHAPTER EIGHT

Epilogue **236**

APPENDIX A

The Quotient Space or Identification Space Topology **243**

| | | |
|---|---|-----|
| 1 | Definitions and basic properties | 243 |
| 2 | A generalization of the quotient space topology | 246 |
| 3 | Quotient spaces and product spaces | 249 |
| 4 | Subspace of a quotient space vs. quotient space of a subspace | 250 |
| 5 | Conditions for a quotient space to be a Hausdorff space | 251 |

APPENDIX B

| | |
|--|------------|
| Permutation Groups or Transformation Groups | 254 |
| 1 Basic definitions | 254 |
| 2 Homogeneous G -spaces | 256 |
| | |
| Index | 259 |
