

Contents

Introduction.....	1
Suggestions for the reader.....	5
Chapter I. Fredholm mappings of index zero and linear boundary value problems.....	6
Chapter II. Degree theory for some classes of mappings.....	15
Chapter III. Duality theorems for several fixed point operators associated to periodic problems for ordinary differential equations.....	31
Chapter IV. Existence theorems for equations in normed spaces.....	42
Chapter V. Boundary value problems for second order nonlinear vector differential equations.....	51
Chapter VI. Periodic solutions of ordinary differential equations with one-sided growth restrictions.....	63
Chapter VII. Bound sets for functional differential equations.....	74
Chapter VIII. The index of isolated zeros of some mappings.....	83
Chapter IX. Bifurcation theory.....	91
Chapter X. Periodic solutions of autonomous ordinary differential equations around an equilibrium.....	99
References.....	109
