

## CONTENTS

### I. Gelfand-Fuks Theory and Characteristic Classes of Foliations

A. Haefliger	Cohomology of Lie algebras and foliations.....	1
A. Haefliger	Whitehead products and differential forms.....	13
R. Bott	On some formulas for the characteristic classes of group-actions .....	25
H. Shulman and J. Stasheff	De Rham theory for BF .....	62
R.B. Gardner	Differential geometry and foliations: the God- billon-Vey invariant and the Bott-Pasternack vanishing-theorems .....	75
P.A.Schweitzer and A.P.Whitman	Pontryagin polynomial residues of isolated foliation singularities .....	95

### II. Qualitative Theory of Foliations

G. Reeb	Structures feuilletées .....	104
J. Palis	Rigidity of the centralizers of diffeomor- phisms and structural stability of suspended foliations .....	114
R.Langevin and H.Rosenberg	Integrable perturbations of fibrations and a theorem of Seifert .....	122
C.Camacho	Structural stability of foliations with singu- larities .....	128
G.Reeb and P.A.Schweitzer	Un théorème de Thurston établi au moyen de l'analyse non standard .....	138
W.Schachermayer	Addendum: Une modification standard de la démonstration non standard de Reeb et Schweitzer .	139
G. Hector	Croissance des feuilletages presque sans holonomie .....	141
E. Fedida	Sur la théorie des feuilletages associée au repère mobile: cas des feuilletages de Lie.....	183

### III. Group Actions and Related Topics

R.J. Knill	On the index of isolated closed tori.....	196
F. Hegenbarth	An application of the $p$ -invariant .....	212
I.J. Dejter	G-transversality to $\mathbb{C}P^n$ .....	222

### IV. Open Problems

P.A.Schweitzer (editor)	Some problems in foliation theory and related areas .....	240
----------------------------	--------------------------------------------------------------	-----
