TRANSCENDENCE METHODS

Michel WALDSCHMIDT

Lecture 1: Preliminary results

§1.1 Liouville estimates ____ p.1.1
§1.2 Siegel's lemma ____ p.1.6
§1.3 Schwarz lemma ____ p.1.10

Lecture 2: Gelfond's method

§2.1 Gel'fond's solution of Hilbert's seventh problem ____ p.2.1
§2.2 Schneider-Lang's criterion ____ p.2.7

Lecture 3: Schneider's method

§3.1 Schneider's solution of Hilbert's seventh problem p.3.1
§3.2 Consequences of Schneider's method ____ p.3.5
§3.3 On the product of the conjugates outside the unit circle of an algebraic integer. ____ p.3.8

Lecture 4: Baker's method

§4.1 The results (qualitative form) ____ p.4.1
§4.2 Sketch of the proof ____ p.4.2
§4.3 The proof ____ p.4.5
§4.4 Conclusion of the proof ____ p.4.8
§4.5 Further results and comments ____ p.4.11

Lecture 5: Kummer's theory

§5.1 An alternative method for the last step ____ p.5.2
§5.2 A second proof of Baker's theorem ____ p.5.3
§5.3 Final descent ____ p.5.8
§5.4 Lower bounds for linear forms in logarithms ____ p.5.10

Lecture 6: Linear independence of elliptic logarithms

§6.1 The results (qualitative form) ____ p.6.1
§6.2 The lemma of Baker-Coates-Anderson ____ p.6.3
§6.3 The main lemma ____ p.6.7
§6.4 Bashmakov's theorem ____ p.6.12
§6.5 Further results and comments ____ p.6.13

Lecture 7: Transcendence and linear independence of periods.

§7.1 Historical survey ____ p.7.1
§7.2 Elliptic integrals of the third kind ____ p.7.6
§7.3 Further results and comments ____ p.7.11

Lecture 8: Algebraic independence of periods

§8.1 Choodnovsky's results ____ p.8.1
§8.2 Gel'fond's transcendence criterion ____ p.8.5
§8.3 Zeroes of polynomials in $z, \wp(z), \zeta(z)$ ____ p.8.6
§8.4 Proof of Choodnovsky's theorem ____ p.8.11
§8.5 Further results and comments ____ p.8.15

Lecture 9: Schneider's method in several variables

§9.1 Polynomials in several variables ____ p.9.2
§9.2 A Schwarz lemma in several variables ____ p.9.5
§9.3 A new proof of Baker's theorem in the real case ____ p.9.9
§9.4 Generalized Dirichlet exponent ____ p.9.12

Lecture 10: Gel'fond's method in several variables

§10.1 Singularities of algebraic hypersurfaces and L^2 estimates ____ p.10.1
§10.2 Bombieri's theorem ____ p.10.4
§10.3 Further results and comments ____ p.10.7
