

## Table of Contents

<b>Chapter 0.</b> Prologue: The Multipliers for $L_1(G)$ . . . . .	1
0.0. Introduction . . . . .	1
0.1. Multipliers for $L_1(G)$ . . . . .	1
0.2. Notation . . . . .	8
0.3. Notes . . . . .	9
<b>Chapter 1.</b> The General Theory of Multipliers . . . . .	13
1.0. Introduction . . . . .	13
1.1. Elementary Theory of Multipliers . . . . .	13
1.2. Characterizations of Multipliers . . . . .	18
1.3. An Application: Multiplications which Preserve the Regular Maximal Ideals . . . . .	21
1.4. Maximal Ideal Spaces . . . . .	24
1.5. Integral Representations of Multipliers . . . . .	28
1.6. Isometric Multipliers . . . . .	33
1.7. Multipliers and Dual Spaces . . . . .	42
1.8. The Derived Algebra . . . . .	44
1.9. The Derived Algebra for $L_p(G)$ , $1 \leq p < \infty$ . . . . .	54
1.10. Notes . . . . .	58
<b>Chapter 2.</b> The Multipliers for Commutative $H^*$ -Algebras . . . . .	61
2.0. Introduction . . . . .	61
2.1. Multipliers for Commutative $H^*$ -Algebras . . . . .	61
2.2. Compact Multipliers for Commutative $H^*$ -Algebras . . . . .	63
2.3. Notes . . . . .	64
<b>Chapter 3.</b> Multipliers for Topological Linear Spaces of Functions and Measures . . . . .	66
3.0. Introduction . . . . .	66
3.1. $M(L_1(G), L_p(G))$ , $1 \leq p \leq \infty$ . . . . .	67
3.2. $M(M_w(G))$ and $M(M(G))$ . . . . .	70
3.3. The Adjoint Argument: $M(L_{p'}(G), L_\infty(G))$ , $1 \leq p' < \infty$ , and $M(C_0(G))$ . . . . .	73

3.4.	$M(L_\infty(G))$ and $M(L_\infty^w(G))$ . . . . .	74
3.5.	$M(L_1(G) \cap L_p(G), L_1(G))$ , $1 < p < \infty$ , and $M(L_1(G) \cap C_0(G), L_1(G))$ . . . . .	78
3.6.	Positive Multipliers and Isomorphisms of $L_p(G)$ , $1 \leq p < \infty$	82
3.7.	Notes . . . . .	88

**Chapter 4.** The Multipliers for  $L_p(G)$  . . . . . 91

4.0.	Introduction . . . . .	91
4.1.	The Multipliers for $L_p(G)$ as Bounded Functions, $1 < p < \infty$	92
4.2.	Pseudomeasures . . . . .	97
4.3.	The Multipliers for $L_p(G)$ as Pseudomeasures, $1 < p < \infty$ . .	100
4.4.	Sets of Uniqueness . . . . .	102
4.5.	Inclusion Results . . . . .	109
4.6.	The Derived Space for $L_p(G)$ , $1 \leq p < \infty$ . . . . .	115
4.7.	Some Further Results Concerning $\mathcal{M}(L_p(G))$ , $1 \leq p < \infty$ . . .	125
4.8.	Notes . . . . .	128

**Chapter 5.** The Multipliers for the Pair  $(L_p(G), L_q(G))$ ,  $1 \leq p, q \leq \infty$  134

5.0.	Introduction . . . . .	134
5.1.	Quasimeasures . . . . .	134
5.2.	The Multipliers for the Pair $(L_p(G), L_q(G))$ , $1 \leq p, q \leq \infty$	146
5.3.	Inclusion Results . . . . .	150
5.4.	The Fourier Transform for $L_p(G)$ , $1 < p \leq \infty$ , and $M(L_p(G), L_q(G))$ , $1 \leq p, q \leq \infty$ . . . . .	159
5.5.	Some Results Concerning $L_p(G)^\wedge$ and $M(L_p(G), L_q(G))^\wedge$ . .	166
5.6.	$M(L_p(G), L_q(G))$ as a Dual Space, $1 \leq p, q < \infty$ . . . . .	180
5.7.	Multipliers with Small Support . . . . .	190
5.8.	Notes . . . . .	192

**Chapter 6.** The Multipliers for Functions with Fourier Transforms in  $L_p(\hat{G})$  . . . . . 195

6.0.	Introduction . . . . .	195
6.1.	The Banach Algebras $A_p(G)$ . . . . .	195
6.2.	The Multipliers for $A_p(G)$ as Pseudomeasures . . . . .	200
6.3.	The Multipliers for $A_p(G)$ : $G$ Noncompact . . . . .	204
6.4.	The Multipliers for $A_p(G)$ : $G$ Compact . . . . .	207
6.5.	Notes . . . . .	216

**Chapter 7.** The Multipliers for the Pair  $(H_p(G), H_q(G))$ ,  $1 \leq p, q \leq \infty$  218

7.0.	Introduction . . . . .	218
7.1.	General Properties of $M(H_p(G), H_q(G))$ , $1 \leq p, q \leq \infty$ . . . .	218

7.2. The Multipliers for the Pair $(H_p(G), H_q(G))$ , $1 \leq q \leq 2 \leq p \leq \infty$	221
7.3. The Multipliers for the Pair $(H_p(G), H_\infty(G))$ , $1 \leq p \leq \infty$	222
7.4. Notes	223
<b>Appendices</b>	225
Appendix A: Topology	225
Appendix B: Topological Groups	226
Appendix C: Measure and Integration	228
Appendix D: Functional Analysis	233
Appendix E: Banach Algebras	244
Appendix F: Harmonic Analysis	249
<b>Bibliography</b>	257
<b>Author and Subject Index</b>	275
