Preface	
J. F. Adams - Operations of the n^{th} kind in \mathbf{K} -theory, and what we don't know about \mathbf{RP}^{∞}	1
Edgar H. Brown Jr. and Michael Comenetz - The Pontrjagin dual of a spectrum	11
Albrecht Dold - Algebraic \mathbf{K} -theory of non-additive functors of finite degree	19
Luke Hodgkin - Dyer-Lashof operations in \mathbf{K} -theory	27
J. R. Hubbuck - Homotopy homomorphisms of Lie groups	33
Ib Madsen and R. James Milgram - On spherical fiber bundles and their PL reductions	43
J. P. May - E_{∞} spaces, group completions, and permutative categories	61
Daniel Quillen - Higher \mathbf{K} -theory for categories with exact sequences	95
Graeme Segal - Operations in stable homotopy theory	105
C. T. C. Wall - Equivariant algebraic \mathbf{K} -theory	111
A. Zabrodsky - On rank 2 mod odd H-spaces	119
