

## Contents

§1.	Introduction .....	3
§2.	Algebraic Preliminaries .....	10
§3.	The Geometry of $X$ : Preliminaries .....	20
§4.	A Metric Definition of the Maximal Boundary .....	31
§5.	Polar Parts .....	35
§6.	A Basic Inequality .....	44
§7.	Geometry of Neighboring Flats .....	52
§8.	Density Properties of Discrete Subgroups .....	62
§9.	Pseudo-Isometries .....	66
§10.	Pseudo-Isometries of Simply Connected Spaces with Negative Curvature .....	71
§11.	Polar Regular Elements in Co-Compact $\Gamma$ .....	76
§12.	Pseudo-Isometric Invariance of Semi-Simple and Unipotent Elements .....	80
§13.	The Basic Approximation .....	96
§14.	The Map $\bar{\phi}$ .....	103
§15.	The Boundary Map $\phi_0$ .....	107
§16.	Tits Geometry .....	120
§17.	R-Rank Greater than One .....	125
§18.	Reduction to Simple Groups .....	128
§19.	Spaces of R-Rank 1 .....	134
§20.	The Boundary Semi-Metric .....	142
§21.	Quasi-Conformal Mappings Over $K$ and Absolute Continuity on Almost All R-Circles .....	156
§22.	The Effect of Ergodicity .....	169
§23.	R-Rank 1 Rigidity Proof Concluded .....	180
§24.	Concluding Remarks .....	187
	Bibliography .....	193
