

## Contents

<i>Chapter 1. Derivatives and Differentials</i>	1
1. Velocity and Slope. Rates of Change	1
2. The Derivative. Differentiable Functions	5
3. Evaluation of Derivatives	11
4. Geometrical Applications	25
5. The Differential	30
6. Higher-Order Derivatives	33
<i>Chapter 2. Applications of Differentiation</i>	41
7. Mean Value Theorems	41
8. Indeterminate Forms. L'Hospital's Rules	50
9. Relative Extrema	61
10. Determination of Absolute Extrema	67
11. Concavity. Inflection Points	71
12. Construction of Graphs	74
<i>Answers to Even-Numbered Problems</i>	79
<i>Index</i>	85
