	Page
1. Introduction	1
2. The C-Ring	8
3. Certain Polynomial Functions on $\bar{\mathbb{N}}$	12
4. An Application of the Campbell-Hausdorff Formula	17
5. The "Fundamental Theorem of Calculus" on $\bar{\mathbb{N}}$	21
6. Some Estimates	23
7. The Representation q	31
8. The Differential Equations Satisfied by $e^{i\nu-\rho(H(\bar{n}))}$	33
9. The Differential Equations on $\bar{\mathbb{N}}$ Satisfied by the Cusp Form	37
10. Application of the Differential Equations	39
11. The Functions $F_J(\nu \bar{n})(b)$	42
12. The Homomorphism $F_J(\nu)$	51
13. Preservation of Certain Filtrations	55
14. Injectivity of the Homomorphism F_J	64
15. Invariance Properties of the Homomorphism $F_J(\nu)$	74
16. Non-Vanishing of Certain Polynomials	91
17. Algebraic Properties of the C-Ring	94
18. The Difference Equations Satisfied by the C-Function	97
19. The Critical Points of the Function $\nu(H(\bar{n}))$	102
20. The Asymptotic Behaviour of the C-Function	107
21. The Uniqueness Theorem	123
22. The Representation Theorems	125
23. Conclusion	130
Appendix 1. The C-Function for the Group $SL(2, \mathbb{R})$	132
Appendix 2. The C-Function for the Group $SL(2, \mathbb{C})$	134
Appendix 3. The C-Function for the Group $SO(1, 4)$	137
Appendix 4. The C-Function for the Group $SU(1, 2)$	143
Appendix 5. The Maximal Parabolic Subgroup in $SL(3, \mathbb{R})$	148
