

CONTENTS

Preface	v
P.ACZEL Quantifiers, games and inductive definitions	1
K.FINE Some connections between elementary and modal logic	15
B.HANSSON and P.GÄRDENFORS Filtrations and the finite frame property in Boolean semantics	32
J.HINTIKKA and V.RANTALA Systematizing definability theory	40
H.R.JERVELL Conservative Endextensions and the quantifier “there exists uncountably many”	63
P.MARTIN-LÖF About models for intuitionistic type theories and the notion of definitional equality	81
H.SAHLQVIST Completeness and correspondence in the first and second order semantics for modal logic	110
A.SALOMAA On some decidability problems concerning developmental languages	144
D.SCOTT Lambda calculus and recursion theory	154
K.SEGERBERG That every extension of S4.3 is normal	194
S.STENLUND Descriptions in intuitionistic logic	197
Author Index	213
