

TABLE OF CONTENTS

PART I

I. INTRODUCTION

SECTION	PAGE
1.1 Historical Remarks	3
1.2 Our Concept of Space	5
1.3 The Choice of a System of Axioms	7

II. PROJECTIVE GEOMETRY AND DESARGUES' THEOREM

2.1 Summary of the Chapter	9
2.2 Axioms of Projective Geometry	9
2.3 A Finite Geometry	13
2.4 Desargues' Theorem	14
2.5 The Principle of Duality	16
2.6 The Fourth Harmonic Point	18
2.7 A Harmonic Sequence and Fano's Axiom	21

III. PROJECTIVE GEOMETRY AND PAPPUS' THEOREM

3.1 Summary of the Chapter	23
3.2 Related Ranges of Points	24
3.3 The Reduction of a Projectivity to Two Perspectives	28
3.4 Pappus' Theorem	32
3.5 The Fundamental Theorem of Projective Geometry	34
3.6 The Conic	37

IV. AFFINE AND EUCLIDEAN GEOMETRY

4.1 Summary of the Chapter	42
4.2 Affine Geometry in the Plane	43
4.3 Euclidean Geometry in the Plane	45

**V. AXIOMS OF EUCLIDEAN GEOMETRY
IDEAL ELEMENTS**

SECTION	PAGE
5.1 Summary of the Chapter	50
5.2 Axioms of Euclidean Geometry	50
5.3 Duality in Euclidean Geometry	58
5.4 Ideal Elements in the Plane	61
5.5 Ideal Elements in Space	65
5.6 Ideal Elements in Euclidean Geometry	67

PART II

VI. NUMBER

6.1 Summary of the Chapter	73
6.2 Number	73
6.3 Integral Numbers	75
6.4 Rational Numbers	77
6.5 Real Numbers	78
6.6 Complex Numbers	83
6.7 Rings and Fields	84
6.8 Finite Fields	87

VII. COORDINATE SYSTEMS

7.1 Summary of the Chapter	90
7.2 Addition and Multiplication of Points on a Line	91
7.3 Coordinates on a Line	94
7.4 Cross Ratio	97
7.5 Coordinates in a Plane and in Space	100
7.6 Finite Geometries	106

VIII. ORDER AND CONTINUITY

8.1 Summary of the Chapter	109
8.2 Ordered Fields	109

SECTION	PAGE
8.3 Order in Projective Geometry	112
8.4 Order in Affine and Euclidean Geometry	116
8.5 Axioms of Order in Projective Geometry	119
8.6 Axioms of Continuity in Projective Geometry	121
8.7 von Staudt's Continuity Proof of the Fundamental Theorem of Projective Geometry	123
8.8 Desargues' Theorem in the Plane	124
8.9 Consistency and Categoricalness	129

**IX. CORRESPONDENCES AND IMAGINARY
ELEMENTS IN GEOMETRY**

9.1 Summary of the Chapter	131
9.2 A Projectivity Between Two Planes	132
9.3 Involutory Correspondence in Space	138
9.4 Imaginary Points on a Line	140
9.5 Complex Geometry	144
9.6 Collineations	149
9.7 Correlations	153
APPENDIX I	157
APPENDIX II	161
BIBLIOGRAPHY	165
INDEX	169
