

CONTENTS

PREFACE	iii
CHAPTER 1. THE CLASSIC GROUPS	1
1. Homogeneous Spaces and the Classic Groups	1
2. Cell Structure of $O(n)$, $U(n)$, $Sp(n)$	8
3. Pontryagin Rings of the Groups $G(n)$	19
Exercises	28
CHAPTER 2. FIBRE BUNDLES	33
1. Definition and Examples of Fibre Bundles	33
2. Pullbacks	40
3. Classification of Bundles in Terms of Coordinate Transformations	46
4. Fibre Bundles with Structure Group	59
5. Constructions and the Bundle Structure Theorem for Homogeneous Spaces	68
Exercises	87
CHAPTER 3. COVERING HOMOTOPY THEOREMS AND UNIVERSAL CLASSIFYING SPACES	93
1. Covering Homotopy Theorems	93
2. A Quick Review of Homotopy Theory, the Exact Homotopy Sequence of a Coordinate Bundle	107
3. Universal Bundles	120
4. Milgram's Construction	132
5. $C_*(B_G)$ and the Bar Construction	148
BIBLIOGRAPHY	166
SUBJECT INDEX	169
