CONTENTS

Preface iii
Conference Participants v

I. INVITED ADDRESSES

D. K. Burke and D. J. Lutzer
Recent Advances in the Theory of Generalized Metric Spaces 1

H. Herrlich
Convenient Categories for Topologists 71

S. Naimpally
Nearness in Topology and Elsewhere 77

P. Nyikos
A Survey of Zero-dimensional Spaces 87

K. Sundaresan
Differential Categories of Locally Convex Spaces 115

II. CONTRIBUTED PAPERS

J. W. Bales
Representable and Strongly Locally Homogeneous Spaces 125

D. E. Bennett
Strongly Unicoherent Continua 127

H. L. Bentley and H. Herrlich
Extensions of Topological Spaces 129

W. W. Comfort, A. Hajnal, and L. Juhász
Compactness-like Properties of Generalized Weak Products 185

A. Garcia-Maynez
Concerning σ-connectedness of Baire Spaces 189

J. Ginsburg and R. G. Woods
On the Cellularity of $\beta X - X$ 191

C. Hagopian
Fixed Point Theorems for Disk-like Products and Hyperspaces 193

A. Y. W. Lau
Existence of n-cells in Peano Semilattices 197

J. D. Lawson
Applications of Topological Algebra to Hyperspace Problems 201

J. D. Lawson and B. Madison
Comparisons of Notions of Weak Hausdorffness 207

H. Martin
Remarks on the Nagata-Smirnov Metrization Theorem 217

L. Nel
Topological Categories with Natural Function Space Structures 225

T. M. Phillips
Extending Continuous Functions 229

D. F. Reynolds
Simple Extensions of Topologies 239

R. L. Russo
Universal Continua 243

B. M. Scott
A Class of Spaces with Many Open Sets 245

R. M. Stephenson, Jr.
Some Unsolved Problems Concerning P-minimal and P-closed Spaces 249

J. E. Vaughan
Total Nets and Filters 259

R. C. Walker
Stone-Čech Compactifications via Adjunctions 267

H. H. Wicke and J. M. Worrell, Jr.
The Local Implies Global Characteristic of Primitive Sequences 269

W. L. Young
Spiral-like Injections of $[0,\infty)$ in the Plane 283

INDEX 289
