

Table of Contents

§1. Introduction	1
§2. The Linear Theory of Normal Hyperbolicity	5
§3. The C^r Section Theorem and Linschitz Jets	25
§4. The Local Theory of Normally Hyperbolic Invariant Compact Manifolds	39
§5. Pseudo Hyperbolicity and Plaque Families	53
§5A. Center Manifolds	64
§6. Noncompactness and Uniformity	67
§6A. Forced Smoothness of $i: V \rightarrow M$	108
§6B. Branched Laminations	110
§7. Normally Hyperbolic Foliations and Laminations	115
§7A. Local Product Structure and Local Stability	132
§8. Equivariant Fibrations and Nonwandering Sets	136
