

TABLE OF CONTENTS

	Page
Introduction . . . . .	v
I. The general theory . . . . .	1
1. Contact . . . . .	1
2. The Grassmann bundle . . . . .	5
3. Adapted frames of a homogeneous space . . . . .	6
4. Zeroth order frames of a submanifold . . . . .	7
5. Lie transformation groups . . . . .	8
6. First order frames . . . . .	9
7. Second order frames . . . . .	12
8. Third and higher order frames . . . . .	17
9. Frenet frames . . . . .	22
10. The role of the Maurer-Cartan form of $G$ . . . . .	23
11. Congruence and Existence Theorems . . . . .	30
12. Homogeneity Theorem . . . . .	41
II. Surfaces in $\mathbb{R}^3$ under $\mathbb{E}(3)$ . . . . .	44
III. Real curves in $\tilde{G}_{4,2}$ under $SO(4)$ . . . . .	58
IV. Holomorphic curves in $\mathbb{C}P^2$ under $SU(3)$ . . . . .	66
V. Holomorphic curves in $\mathbb{C}G_{4,2}$ under $SU(4)$ . . . . .	81
VI. Surfaces in $\mathbb{R}^3$ under the special affine group . . . . .	115
References . . . . .	151
Index . . . . .	152
