

Contents

	Preface	
I.	Preliminary Results	1
	1. Bott's Vanishing Theorem	1
	2. The First Godbillon-Vey Class	6
	3. Examples of Roussarie, Thurston and Bott	10
II.	Higher Exotic Classes	17
	1. The Godbillon-Vey Class in Codimension q	17
	2. Real Secondary Classes	19
	3. Complex Secondary Classes	26
	4. Examples	28
III.	Relations with the Cohomology of Formal Vector Fields	44
	1. Foliations and L_q	44
	2. The Cohomology of L_q	53
	3. L_q and Distributions	58
IV.	Variation of Secondary Characteristic Classes	64
	1. Variation of Foliations	64
	2. Variation of Lie Algebras	70
	3. Rigidity	75
	Appendices	
I.	Connections, Curvature and Characteristic Classes	82
II.	Cohomology of Lie Algebras	96
	References	106
