

TABLE OF CONTENTS

Introduction	1
Chapter 1: Lifting projective representations	6
Chapter 2: Local primitive galois representations	18
Chapter 3: Two-dimensional representations over \mathbf{Q}	36
Chapter 4: The L-series of an icosahedral representation	49
Chapter 5: Classical modular forms of weight one	70
Chapter 6: An icosahedral form	80
Bibliography	95
Appendix 1: The sextic resolvent	98
Appendix 2: Extensions of \mathbf{Q}_5 of degree 5	100
Appendix 3: The A_4 extension of \mathbf{Q}_2	103
Appendix 4: S_4 extensions of \mathbf{Q} unramified outside 2 and 5	108
Appendix 5: Algorithms	115
Appendix 6: Fourier expansions at arbitrary cusps	125
Appendix 7: The holomorphy of A_5 L-series	132
Index	142
